1st September 2022

CERTIFICATE

This is to certify that SJB Institute of Technology Bangalore has conducted detailed Environmental Green Audit of their campus and has submitted necessary data and credentials for scrutiny. The activities and measures carried out by the college have been verified based on the report submitted and was found to be satisfactory. The efforts taken by the faculty and students towards environment and sustainability is highly appreciated and commendable.

Executive Summary:

Nature encompasses fascinating inhabitants like microorganisms, plants, animals, insects, etc., who have as much right to live as we do. People all over the world see nature differently. With the climatic conditions going haywire all over the world, there is a need for resilient infrastructure, actions and a strong mindset for driving lifestyle change. Students being future citizens of the world can drive change and strive for a better existence and this would be possible only if educational institutions impart values and space for them to grow. They also have the ability to influence their families and the general public more effectively than even a learned motivator. Teachers play an undeniable role in imparting knowledge to the students. Hence, teachers are in a position to facilitate knowledge and promote the learners to achieve better awareness about what is happening in and around them. Teachers as professionals and influential individuals, supported by the management of institutions, can play an important role in moulding students' attitudes through training and encouraging them to be the role models in their communities. An educational institution thus can offer an ideal service in forging the young minds in their impressionable age, towards promoting the health of nature, understanding the underlying causes of climate change and its impacts, and the conditions required to be maintained for sustaining life on earth.

Green Audit is, therefore to make the entire college and the society understand through trained students, how heavy their carbon footprint is, and help in the remediation process while making their campuses and living surroundings 'as green as one can make it'. It is also a search of futuristic ways to climb up the ladder through continuous effort and sustainable ways of sustenance.

The result of such an exercise would help parents and other visitors to the campus appreciate responsible behaviour and admire the novel ways in which the campus team has strived to achieve their “shade of green”. A green audit can also be a useful tool for a college to know how and where they are using the most energy, water or other resources. The college can thus plan for the necessary changes and ensure savings. It can also be used to improvise their waste minimization strategy. Green auditing and the implementation of mitigation measures will be a win-win situation for the college, the learners and the planet. It can also create health consciousness and promote awareness of the environment, ethics and values.

Eco-campus is a concept often used by educational institutions around the world to make campuses more sustainable by reducing wastages and enabling their safe disposal into the environment. Waste minimization plans for academic institutions are now mandatory to ensure that the campus is cleaned regularly. As an eco-campus, performing a green audit of the institution is critical. The green auditing of SJB Institute of Technology in Bengaluru allows the assessment of lifestyle, actions, and their impact on the environment. The audit was primarily focused on greening factors such as energy consumption in terms of electricity, water management, waste management, and green spaces management. A series of methods were used to obtain information about the green practices of the college. A set of questions were formulated, reports and documents were verified and a series of interviews were conducted with people in charge of each criterion was done to ensure the accuracy of information. The information gathered was organized, tallied, and analyzed. Finally, a report on environmental observations and recommendations for improvement were listed out for the perusal of the management.

1. Introduction:

Green audits help analyse local environmental practices both inside and outside the university premises which influences the atmosphere of the campus. Therefore, 'Green Audits' can be defined as a systematic, identification, quantification, recording, reporting and analysis of components that constitute a university environment. Through such audits, the current status, scope for improvement, and recommendations for improvement can be made available which would further improve the structure of the environment and enhance the efficiency and atmosphere of the campus.

A green audit also serves as a means to identify opportunities for sustainable development practices, enhance environmental quality, improve health, hygiene and safety, reduce liabilities and save money and achieve values of virtue.

Green audits are assigned to criteria 7 of the National Assessment and Accreditation Council, which is a self-governing organization that provides various institutions with grades based on their criteria for accreditation. This accreditation provides a college with an opportunity to present itself as an esteemed institution without impeccable values, infrastructural advantage and endless opportunities it could provide its students.

1.1.1. Need for Green Audits:

Green audits help analyse and determine good institutional practices; whether they are eco-friendly or sustainable. With the world constantly changing, development, unfortunately results in large-scale utilization of natural resources. Now natural resources are not just used for the production and consumption of commodities. Energy, water are all basic elements that are used generously by all. With the threat of depleting resources looming over our heads, it is imperative to determine how much we use and where we waste resources to ensure efficient usage. Green audits provide opportunities to determine the same and help the organization to reflect, improve and expand their processes and shift to clean green resource utilization. Apart from this, it helps instil consciousness among people as part of the institution towards the environment and sustainable resource utilization.

1.1.2. Goals of Green Auditing:

- a) Identification of strengths and weaknesses in green practices.
- b) Analyse and suggest solutions for problems identified.
- c) Identify and assess environmental risk.
- d) Motivate staff for optimal sustainable use of available resources.
- e) Increase environmental awareness throughout the campus.
- f) Collect baseline data of environmental parameters and prepare plans for issues before they become problems.

1.1.3. Objectives of Green Audit:

- a) Analyse current practices and determine their impact on the environment.
- b) Identify and analyse significant environmental issues.
- c) Continuous assessment for better environmental performance.
- d) Establish and implement a green culture on the campus and sensitize the faculty and students.

1.1.4. Benefits to Educational Institutions:

- a) Improve the environment within and outside the campus premises.
- b) Help recognize cost-effective green strategies like waste minimization, energy conservation, water replenishment etc.
- c) Empower people linked to the organization to move towards conscious environmental thinking and practice.
- d) It helps improve the image and builds a positive impression of the institution for its green and clean approach.

2. Scope of Green Audits:

The benefits of green auditing practices are the following:

- a) Environmental education through systems thinking and environmental management system approach.
- b) Benchmarking for environmental protection initiatives.
- c) Financial savings through efficient resource use.
- d) Enrichment of curriculum through hands-on experiences.
- e) Enhancement of college profile and improving environmental standards.
- f) Strengthening the environmental ethics and value systems in young people.
- g) Developments of ownership, social and personal responsibility for the campus and its surrounding environment.

3. About the College:

Sri Jagadguru Balagangadharanatha Swamiji Institute of Technology is a private engineering college in Bengaluru established in the year 2001. The College is affiliated to the Visvesvaraya Technological University (Belagavi), approved by AICTE (New Delhi) and recognized by the UGC, New Delhi with 2(f) and 12(B).

SJBIT is spread across an area of 13 acres of land with a built-up area of 58967.43 sqm. With a strong vision that strives to be a recognized technical education centre with global perspective and a mission to provide learning opportunities that foster students' ethical values, intelligent development in science and technology and social responsibility so that they become sensible and contributing members of the society.

The college management has slowly made conscious steps towards bringing an overall positive and environment friendly campus for the benefit of both the students as well as long term benefits for the institution. The institution has mindfully provided sufficient space for all the essential requirements of the students, such as parking areas, proper roads, sitting areas, well-maintained washrooms, clean filtered drinking water, good playgrounds, well-managed green space and most importantly fully functional waste water management units. The corridors are clean and provisions for dustbins and lights wherever necessary are present.

SJBIT is a well-recognized technical institution fostering quality education in the last 21 years. They provide placement training, technical skill enrichment programs, soft skill trainings that enable students to get placed in multinational companies with a top-notch reputation. The College features a huge library with a good collection of books and an exclusive digital library facility, an indoor

auditorium, a hi-tech gym facility on campus. The college features separate hostels for girls and boys with all facilities and a dedicated staff. The institute encourages sports and provides facilities for outdoor games like Cricket, Volleyball, Football and Basket-ball court along with a centralized AC Indoor Sports Complex. The college campus consists of Bank, Medical facility, ATM and cafeteria for both students and faculty.

4. Observations and Recommendations:

4.1 Water Management:

Water is an important resource that is depleting at a rate faster than what can be recovered. All beings depend on water for their survival. Although the earth is covered by water majorly, freshwater that is used for drinking purposes is very limited. Hence, it is very important to use water judiciously and make arrangements to collect and preserve water whenever possible for replenishment of the water table. This indicator addresses water consumption, water sources, irrigation, stormwater, appliances and fixtures. A water audit is an on-site assessment and surveys to determine the practices and efficiency of usage.

- **Observations:**

The major source of water supply are campus borewells, tanker services and the layout water supply in the college premises. Everyday 11 (6 in college + 0 in Girls Hostel + 5 in Boys Hostel) are operated to fill the overhead tanks with a total capacity of 1,30,000 ltrs. The tanks have a system of automatic water level controllers to ensure limited wastages. Water is majorly used in washrooms, canteen, administrative areas, academic areas, hostels and gardening purposes. On an average, the total annual consumption of water in the college is 54.75 MLD. The management has made available provisions for purified drinking water on campus for the students and other staff. Wherever applicable the washrooms have fittings such low flow faucets, low flow shower heads, low flow toilets and urinals to ensure minimum wastages.

During the survey, no wastages were observed. The open grounds provide means for water percolation as they are not barren due to ample greenery on campus. A proposal for a functional rain water harvesting unit has been initiated in the campus premises. All the waste water from the campus is treated by a fully functional Sewage Treatment Plant and is reused in the college premises.

Rainwater outflow point at SJB Institute of Technology

SJB Institute of Technology Campus Layout

Recommendations:

1. Push Button taps can be implemented phase wise in wash rooms to prevent water wastage.
2. Rain water harvesting units can be improved in the premises to conserve rainwater run-off and recharge pits can be employed close to the borewells or wells to help recharge the groundwater table.
3. Need for systems to control overflow of water while filling up overhead tanks.
4. Minimizing wastages by reducing, reusing and recycling wherever possible.
5. Installation of aerators in all taps to reduce wastage and consumption. Automated taps could also help reduce usage.
6. Fix leaky faucets and flushes regularly.
7. Ensure all disinfectant products used are eco-friendly and do not cause major harm to the environment.

4.2 Energy Management:

Energy conservation is an important component of campus sustainability, as it is linked to the institution's carbon footprint. Energy auditing primarily is associated with energy conservation and techniques for reducing consumption that contributes to environmental degradation. As a result, any environmentally conscious institution must evaluate its energy usage policies. This indicator addresses energy consumption, energy sources, energy monitoring, lighting, appliances, and vehicles. Energy use is an important aspect of campus sustainability and thus requires no explanation for its inclusion in the assessment.

Sl No.	Load	Numbers
1	Lights	1612 (Tube lights – 1333 + LED 172+ CFL - 107)
2	HV AC system	Fans – 901 AC – 7
3	Motors	Borewell – 4 Lift – 4

Sl No.	Specifications	Power	Qty
1	Kirloskar Diesel Generator Sets	250KAV	1
2	Cummins Diesel Generator Set	320KVA/415V	1

Solar Meter Readings	Total units (Feb 2022)
ECE - EEE Block	27,808
MECH – CIVIL Block	17,648

Computer Information

Observations:

Energy is one resource that is used in every branch of the institution. The primary source of energy is electricity and the total energy consumption for the FY 2021-22 is 730,812.5 Units respectively. Apart from this, there is a provision for a generator for emergencies. The college also uses UPS (36 numbers) on every floor for backup during power outages. All the rooms are well-lit and have enough and more provisions for natural lighting thereby saving a lot of energy in the day times. Apart from this the institution is slowly phasing out their older lighting to CFL's. The authorities have taken extra care to purchase only Energy Star certified equipment to ensure efficient usage of energy. The management has utilized its terrace space and invested in solar energy which is a renewable energy resource and the energy harvested is sent to the electricity department for a waiver in the electric bills. The total capacity of the solar power plant is 423.68 kW. The panels are spread over an area of 90000 sqft of the terrace space.

**Recommendations:**

1. Existing UPS system needs to be upgraded to smart UPS system which will help the institution to save energy.
2. Foot valves shall be used to automatically switch off the water supply when the tank reaches optimal levels. This could help save both energy as well as water. Automatic bore well management systems with sensors at the overhead tank as well as underground would help pump water only in case of shortages.
3. Using Brushless Direct Current Fans could help reduce the consumption by half. All traditional electric appliances shall be replaced with energy-efficient ones to reduce power consumption and wastages.
4. Lighting in some areas such as the toilets can be controlled by PIR (passive infrared light) sensors.
5. Holding power conservation and awareness events could help keep the college community engaged.
6. Switch on the energy saving modes in computers so that the system would shut down when there is no activity or idle.

4.3 Waste Management:

Solid waste can be categorized into three types namely: Biodegradable, Non-Biodegradable and Hazardous Waste. In an institutional setting, the only hazardous waste generated is E-waste and Sanitary Waste. Biodegradable or Wet waste is mainly leftover food components, canteen waste etc., while non-biodegradable includes recyclable waste like plastics, tin, bottles, papers etc. E-waste majorly contains harmful chemicals and metals that could cause harm to the handlers or even cause harmful gas emissions in case it is burnt in landfills. Such waste needs to be collected and given special treatment. Thus, minimization of solid waste is an essential win on the road to sustainability. This indicator addresses the waste collection and disposal mechanisms.

Observations:

The total waste collected on the campus is around 73 tons of wet waste and 7.3 tons of dry waste for the year 2020-21. Waste segregation seems to be taking place at the source itself. There were provisions for dustbins with clear demarcations for wet waste and dry waste in every place possible. All the segregated waste are sent to the respective vendors. Wet waste is sent to piggeries, dry waste to recycling units and E-Waste to the respective authorized vendors who would safely dispose of the waste components after extraction of required materials. The institution encourages extensive usage of E-communication thereby moving towards a paperless mode of communication.

The college has a fully functional STP (Sewage Treatment Plant) with a capacity of recycling up to 550 KLD in place that takes care of all the grey water recycling. It runs for 18 hours in a day. The water first passes through a collection tank with a bucket screen that screens solid waste initially. Following which the water is moved to an equalizer tank and then to an anaerobic digester used for treatment of wastewater. After the digestion of waste using microbes, the water is moved to an aeration tank that provides a constant supply of oxygen to allow the microorganisms to digest the organic waste. The water is then moved to a clarifier tank to allow the sludge to settle at the bottom. The recycled water is sent to filtration units to further process the water and then finally sent to the

collection tank. The recycled water is then utilized for gardening purposes. A thorough STP plant is necessary as the lab waste and other sewage needs to be thoroughly treated. The presence of this impeccable recycling option in the campus definitely shows that the opportunities for water utilization is fully explored.

Recommendations:

1. Having proper sanitary waste disposal mechanisms on site like an incinerator for safe disposal are a part of good environmental practices. Having sanitary pad vending machines could also benefit the students on campus.
2. Applying concepts of Reduce, Reuse, Recycle and Refurbish wherever possible could instil a green mentality in the campus.
3. Installing proper composting units in the form of pits to take care of wet waste in the premises itself could be beneficial to the institution. This could be done involving students and the compost could be used as nourishment for the trees and plants on the campus.
4. Training and campaigns in cotton bag making for students and staff will reduce the usage of throw away plastic carry bags.
5. Leaf litter from the campus can be effectively used for aerobic/vermicomposting so that the composted material can also be used as good manure.

4.4 Green Space Management:

With the rapid increase in urbanization, the availability of green spaces for recreation and relaxation is slowly reducing leading to detrimental repercussions on student growth and health. Students need to grow and learn in environments that promote their physical health as well as their cognitive development to enhance their academic learning. Green spaces boost mental health among adults and can offset traffic emissions. Greenery can help reduce air pollution in several ways like filtering air, restoring water tables, reducing heat island effects and reducing noise levels.

a) Observations:

SJBIT has extensive green cover spanning over their campus space. The college campus consists of various trees as well as plants. The garden maintenance team of SJBIT identifies the areas in the campus where new saplings are to be planted, manage the procurement of saplings from the nursery and is responsible for planting of saplings, watering the plants and other garden maintenance activities. The construction of new block was carefully done without uprooting any trees.

Details of Trees Within Campus: (Height: 4feet and above)

Sl.No.	Botanical Name	Local Name
1.	<i>Grevillea robusta</i>	Silver oak
2.	<i>Tabebuia rosea</i>	Trumpet Tree
3.	<i>Calotropis gigantea</i>	Ekka
4.	<i>Spathodeacampanulata</i>	African tulip tree
5.	<i>Azadirachtra indica</i>	Neem
6.	<i>Phyllanthus emblica</i>	Amla
7.	<i>Bougainvillea glabra</i>	Bougainvillea
8.	<i>Pongamia pinnata</i>	Indian beech
9.	<i>Saracaasoca</i>	Ashoka
10.	<i>Artocarpus heterophyllus</i>	Jack fruit
11.	<i>Plumeria alba</i>	White frangipani
12.	<i>Cycus</i>	Cycad
13.	<i>Ixora</i>	West Indian jasmine
14.	<i>Persea americana</i>	Butter fruit
15.	<i>Oxalis</i>	Wood sorrels
16.	<i>Albizia julibrissin</i>	Persian silk tree
17.	<i>Ficus benghalensis</i>	Banyan
18.	<i>Cassia javanica</i>	Apple blossom tree
19.	<i>Paulownia tomentosa</i>	Royal forms
20.	<i>Tectona grandis</i>	Teak
21.	<i>Dypsishutescens</i>	Areca palm

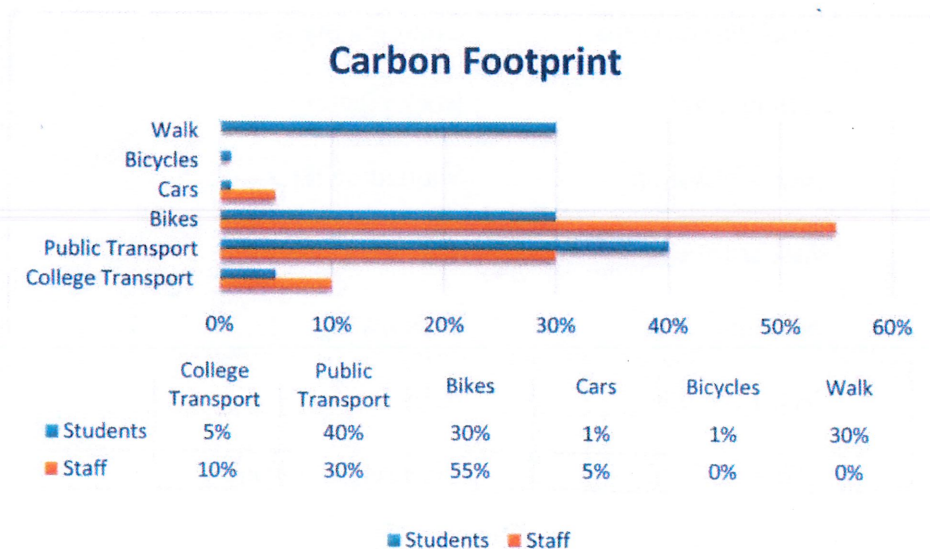

Details of animal biodiversity on campus:

Sl.No.	Scientific Name	Local Name
1.	<i>Leptocomazeylonica</i>	Purple rumped sunbird
2.	<i>Nectarinia asiatica</i>	Purple sunbird
3.	<i>Parus cinereus</i>	Grey tit
4.	<i>Accipiter badius</i>	Shikra
5.	<i>Bubulcus ibis</i>	Cattle egret
6.	<i>Saxicoloidesfulicata</i>	Indian robin
7.	<i>Dicirismacrocerus</i>	Black drongo
8.	<i>Pycnonotusjocosus</i>	Red whiskered bulbul
9.	<i>Meropsorientalis</i>	Green bee eater
10.	<i>Terpsiphone</i>	Paradise flycatcher
11.	<i>Ardeolagrayii</i>	Pond heron
12.	<i>Milvus migrans</i>	Black kite
13.	<i>Funambulus palmarum</i>	Squirrel
14.	<i>Acridotheres tristis</i>	Common myna
15.	<i>Columba livia</i>	Rock pigeon
16.	<i>Strix occidentalis</i>	Spotted owlet
17.	<i>Haliasturindus</i>	Brahminy kite
18.	<i>Tyto alba</i>	Barn owl
19.	<i>Priniasocialis</i>	Ashy prinia
20.	<i>Psittaculakrameri</i>	Rose ringed parakeet

b) Recommendations:

- Keeping records of the trees and plants on the campus and looking out for opportunities would help increase their number.
- Including environmental sciences as an added subject in the curriculum for at least one module would benefit students in understanding the environment.
- Including opportunities for students to volunteer and be a part of environmental organizations by incentivizing the same for extra credits could help them achieve a number of personal goals that would be beneficial in their careers.
- Including projects that involve environmental concerns and what students can contribute from their respective fields as a part of the curriculum to enhance problem-based thinking capabilities.

5. Summary:

An audit of natural resources is an important tool for ensuring that natural resources are being used in an eco-friendly and sustainable manner. Green auditing is the process of determining whether institutional practices are environmentally friendly and sustainable. It is a continuous process of identification, monitoring and discussion. There is scope for further improvement, particularly concerning waste, energy and water management. The college in recent years consider the environmental impacts of most of its actions and makes a concerted effort to act in an environmentally responsible manner. Even though the college does perform fairly well, the recommendations in this report highlight many ways in which the college can work to improve its actions and become a more sustainable institution.

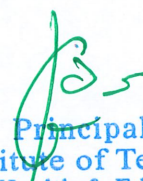

Figure 1: Good Environmental Practices for Sustainable Development.

6. Corollary:

From the green audit, the following conclusions can be made:

- ❖ Water management consists majorly of the rainwater harvesting systems that bring in a good amount of water that could be used during difficult times. More thought could be put into rainwater recharge pits that could replenish the ground water table.
- ❖ Food waste or wet waste, in general, can be turned into compost that can be used as enrichment for the green on the campus. This would help them institution lessen its dependence on the local authorities for disposal.
- ❖ E-waste is segregated, handled and disposed of properly in an eco-friendly and responsible manner.
- ❖ Reduction in the use of one-time-use plastics like bottles, cups, folders, pens and other decorations could help reduce the plastic waste menace on the campus.
- ❖ Wear masks signage were seen on the campus.

Policy document on Green campus initiatives

Preamble: SJB institute of technology is pioneers in promoting modern day education system with green campus initiatives for sustainability of green environment. And we focus on the clean green and reduced pollution free environment to provide effective learning experiences. The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of the mankind.

Objectives

1. To sustain the campus's ecological systems and natural resources.
2. To manage the of the various types of degradable and non-degradable waste
3. To incorporate environmental issues into academic programs for outreach and social development initiatives.
4. Awareness creations about environmental issues among stakeholders.
5. To incorporate the green initiatives inside the campus

Methodology

1. Alternate sources of energy and energy conservation measures:

SJB Institute of technology being a green and student friendly campus works with environmental conscious and works for sustainability. As it taken the responsibility of energy conservation in the campus in the aspects of energy efficiency the following steps may undertaken

- Solar generation system: Solar PV power plant and water heater installed on SJBIT rooftop should be utilized for powering the entire institute and water heaters for hostels
- LED Displays and lamps: Traditional lightning's should be replaced by LED bulbs to minimize the energy consumptions
- Awareness creation on energy conservation among students: Sign Boards should be installed in class rooms and laboratories

2. Management of the various types of degradable and non-degradable waste

With theme of reduce ,recycle and reuse SJBIT always focus to conserved ecosystem by performing tasks to ensure judicious use of environmental resources to meet the needs and aspirations of the present and future generations. To strive Eco-Friendly atmosphere in the campus on the following initiatives can be undertaken

- Solid waste management:

The undertaking of solid waste management to assess quantity of food waste that would convert into biogas is encouraged

➤ Liquid waste management:

Waste water treatment plant can be installed inside the campus to manage the waste water generated from various sources in the college to recycle effectively

➤ Bio medical/E- Waste management:

Minimum amount of Biomedical waste originates in the college should be out sourced along with hospital waste

The E waste are removed disposed and auctioned to the authorized dealers as per norms.

➤ Waste recycling system

The withered leaves of landscaping trees inside the campus should made use in preparing the compost.

➤ Water conservation:

Waste water recycling and Rain water Harvesting should be implemented inside the campus to conserve the water

3. To incorporate environmental issues into academic programs for outreach and social development initiatives.

Should incorporate the environmental challenges and awareness to the students through programs like NSS, Community service along with curriculum

4. To create the awareness among environment issues and conservation of energy the following programs are adapted through various committees

- Rally /Marathon Programs
- Guest lectures
- Plantation and maintenance of the plants
- Environmental promotion activities among the students

5. Green campus initiatives: SJBIT should work with Commitment to sustainability of green environment inside the campus in following ways

- Restricted entry of automobiles
 - Institute encourages the stake holders to use bus as the transportation,
 - Security precautions are made mandatory for all type of vehicles,
- Pedestrian Friendly pathways
 - Well planned pathways are designed on either side of the roadways.
 - Pedestrian-pleasant pathways are well marked with appropriate logo/sign

- Ban on use of Plastic:
 - To beat the plastic pollution in the environment institute ban the single use plastic
 - Sign boards have been placed at regular intervals throughout the campus to create awareness on reduce the use of plastics.
 - Promoting the students to the theme refuse, reduce and reuse the plastic products in their daily needs
- Landscaping with trees and plants :
 - The campus houses number of trees of various species helping in creating the green environment by reducing the carbon dioxide production.
- Paperless office:
 - Office work should be done with minimal uses of paper and priorities with digital documentation and online communications

NSS Regular Activity 2017-18

March 2018

1. National Service scheme unit, SJB Institute of Technology on 07/3/2018 conducted **watering the plants** on account of “**World Health day**” at college campus. After watering the plants we barricaded them to protect them from the natural elements like heavy rain and winds. This programme was a huge success as all volunteers participated.

- 2.) National service scheme Unit, SJB Institute of Technology on 15/03/2018 conducted **Computer Training Programme** an account of “ **International Day of Forests 2018**” for Government Middle school students at Anchepalya, Near Kumbalagudu, Bangalore from 9:30am to 3:30pm. In this programme all the students actively participated and enjoyed operating the computers and also keenly learnt practical knowledge of computers.

Sir,

Sub: Request for permission for holding 07-Days Special Camp at J Byadarahalli, Channapatna Taluk & Ramanagara District.

We would like to bring to your kind information that, the NSS Unit of our College propose to hold a 07-Day special Camp from 25th February to 3rd March 2019 at J Byadarahalli, Channapatna Taluk & Ramanagara District, Karnataka.

The 07-day long Camp includes plantation of Trees, embarking on cleaning of village roads, Ponds and conduction of health Camp (Eye check-up/general medical check-up, etc) for the poor and aged, and pre-school education programme to provide computer knowledge to children of poor and down trodden people, etc. The Camp also includes discussion on eradication of social evils like casteism, regionalism, corruption, untouchability, etc among the villagers.

In this regard, we would request you to kindly give permission to us for holding the above camp and waiting for your kind approval.

Thanking you,

Dr. Doreswamy. B.H

Details of Annual Special Camp

“Annual Special Camp” at J Byadarahalli from 25-02-2019 to 03-03-2019

Date: 25-02-2019, Monday:

Monday (25/02/2019) morning at 8.30 am we left SJBIT college and reached J Byadarahalli village at 10:00 am, where we cleaned the camp accommodation space and stored the camp things, then finished breakfast at 10:30 am.

From 11.30 am onwards, the NSS volunteers went to the houses of the village and explained the basic objectives of the National Service Scheme and invited all to the inauguration ceremony. With the divine memory of Sri Sri Sri Dr. Balagangadharnatha Mahaswamiji and blessings of Sri Sri Sri Dr. Nirmalanandanatha Mahaswamiji and Poojya Revered Sri Sri Dr. Prakashnath Swamiji and under the chairmanship of Sri Sri Annadaneshwaranatha swamiji and Dr. Puttaraju Director & Principal, SJBIT, Sri M. Ramakrishna, Executive Officer, Channapatna, performed the opening ceremony by lighting the Jyoti at 4pm in the presence of village leaders and villagers.

Sri Sri Annadaneshwaranatha swamiji addressed the NSS volunteers. Director and guardian of the camp Dr. Puttaraju explained the objectives of the camp program. National Service Scheme Coordinator, Bangalore University Dr. Srinivas spoke about the basic purpose of the National Service Scheme, the responsibility of the workers of the National Service Scheme.

BGS Health & Education City

Kengeri, Bangalore-560060

After 6:00 pm on the same day, the international level singers Dr. B R Sivakumar, J Byadarahalli and Shri. H. S Survottam, N Halasanahalli & camp members performed the Cultural program.

Date: 26-02-2019 Tuesday

The second day of the camp on 26/02/2019 (Tuesday) started as usual at 7:30 am Mr. Choudegowda, former president of SDMC, Govt. High School J Byadarahalli started the days activities of the camp by hoisting the National flag. Mass exercise and yoga was done, along with all the campers and the youth of the village.

A program was arranged for information and demonstration about the training and use of computers for the children of the Primary Health Center of the village and J Byadarahalli Government School with the motto "HasireUsiru, Aksharateye Swarga Anaksharateye Naraka". In this program, the campers gave information and demonstration program to school children about computer training and use from 10:00 am to 4:00 pm. In this program, children learned about the use of computers, they also enjoyed using computers, and showed interest in gaining more knowledge about computers in the future. In addition to this, he made the school children aware of science, environment, cleanliness and health. Plastic waste scattered in the school premises was cleaned and students gave an assurance that they will not use plastic in their homes. The school children participated with great interest in these programs and the school teachers cooperated wholeheartedly.

Dr. B H DORESWAMY
 NSS Programme Officer
 Professor & Head, Dept. of Physics

 BGS Health & Education City
 Kengeri, Bangalore 560079

From 4:00 pm to 6:00 pm Mr. Choudegowda, former SDMC President, Govt. High School, J Byadarahalli. under the chairmanship of Prof. Bheemaraju Earegowda, personality development trainer Mysore gave a lecture on personality development. On the same day at 6.00 pm there was comedy by Prof. Shri Bheemraju Earegowda and evening cultural programs by the NSS volunteers.

Date : 27-02-2019 Wednesday

The third day of the camp 27/02/2019 (Wednesday) as per practice, at 7:30 am B H Thimmegowda, the former president of J Byadarahalli Milk Producers Association started the proceedings by hoisting the national flag. This was followed by collective exercise and yoga with all the campers and the youth of the village, and exchanged ideas about the importance of yoga. We had organized an awareness program about making the country plastic free.

Under this program at 11:00 in the morning we removed the plastic waste scattered in the steps and premises of Sri Vade Malleshwar Hill, J Byadarahalli village. And in this program we made the public aware about the ill effects of using plastic. We went to the people living at the foothills, the temple supervisors and the villagers and requested them to ban plastic items and to put up poster about banning of plastic. All responded positively on this matter.

Dr. B H DORESWAMY
 NSS Programme Officer
 Professor & Head, Dept. of Physics

 Kengeri, Bangalore-560 060

At 4:00 p.m., under the chairmanship of former president of J Byadarahalli Milk Producers' Association, BH Thimmegowda, a special lecture program on modern sericulture was organized. And at 6:00 pm there were cultural programs by the NSS volunteers and villagers.

Date: 28-02-2019 Thursday

On the fourth day of the camp, 28/02/2019 (Thursday) at 7:30 am Mr. T. ChikkeGowda commenced the program of the camp by hoisting the national flag. All the NSS volunteers and the youth of the village did collective exercise and yoga.

According to the saying "Science is the mantra of development", an information and demonstration program was arranged for the children of J Byadarahalli Government Higher Primary School about computer training and usage. The program was conducted from 9:30 am to 4:00 pm. He showed interest in acquiring more knowledge about computers in the coming days. In addition, he made the school children aware of science, environment, cleanliness and health and plastic waste scattered in the school premises was cleaned. The school children participated with great interest in these programs and the school teachers cooperated wholeheartedly.

 BGS Health & Education City
 Kengeri, Bangalore-560 080

From 4:00 pm to 6:00 pm horticulture program was conducted under the chairmanship of Mr. T Chikkegowda of J Byadarahalli. A program was held to inform about the benefits available to farmers. As per regular practice, on the same day at 6:00 pm onwards the NSS volunteers conducted cultural programs.

Date : 01-03-2019 Friday

The fifth day of the camp 01/03/2019 (Friday) morning at 7:30 a.m. Sri Tammayya Dollegowda commenced the programs with national flag hoisting in J Byadarahalli. All the campers and the youth of the village did yoga, with the motto "Swachh Parisara, Nitya Arogya" at J Byadarahalli village from 09:30 am to 02:30 pm for public free health checkup camp by BGS Global institute of Medical science College and B.G.S. Health and Education City, Uttarahalli Road Kengeri, Bangalore-60, with his cooperation. About 20 doctors, 30 nurses provided free treatment for all types of diseases such as diabetes, blood pressure, chest pain, heart disease, exhaustion, appendicitis, hemorrhoids, hemorrhoids, eye, bone related diseases, children, pregnant and women related diseases and more.

 Kengeri, Bangalore 560 010

In addition to providing advice, the patients were given free of cost medicines. More than 500 patients of J Byadarahalli and surrounding villages benefited from this program. On the same day from 4.00 pm to 6:00 pm Mr. Tammaiah Dollegowda organized a seminar program titled Peacefulness in Dairying under the chairmanship of J. Byadarahalli. In this program, we brainstormed with the public about the facilities that are available from the government and the challenges that need to be faced to get them. After 6:00 pm there were cultural programs by the NSS volunteers and villagers.

Date: 02-03-2019 Saturday

The sixth day of the camp (02/03/2019) Saturday, as per practice at 7:30 am Sri KaaleGowda Principal, SVM Postgraduate College, J Byadarahalli commenced the camp programs with the hoisting of the national flag. All the NSS volunteers and the youth of the village did mass exercise and yoga together.

"Swachhparisara, Nitya Arogya", we cleaned the village drains which were full of mud and garbage and made the sewage flow out of the village easily, and in the coming days, we told the villagers and school children about how to prevent sewage from standing in these drains. Informed, and organized jatha program to create awareness among the villagers about cleanliness and toilet.

In this program we created awareness among the villagers to maintain cleanliness in public places and build toilets in every house. Dr. Pattaraju, Camp Director, and Principal, SJBIT, took charge of the Program.

Mr. Prasannakumar, Zilla Panchayat Member, Kodambally, Mrs. Sunitha Siddappa, Panchayat Member, Kodambally, Mrs. Jayalakshmi, Jayakant, gramapanchayath President, J Byadarahalli, & Mrs. Jayalakshamma Nagaju Vice President of grama panchayath J Byadarahalli, Shri Sujeendra Panchayat Development Officer J Byadarahalli, Sri Ramachandru Member J Byadarahalli, Mrs. Ramashivanna is a member of grama panchayat. Mrs. ShantammaMahadevaiah, Member of gramapanchayath J Byadarahalli, Mr. Vaidyegowda, Sri Wademalleswara Pre-Graduation College Land Donor, J Byadarahalli, Mr. B.V. Raju, J. Byadarahalli were present.

Date : 03/03/2019 Sunday

Seventh and last day of the camp 01/03/2019(Sunday) As per practice, at 7:30 am Mr. Prasanna kumar Zilla Panchayat members, Kodambally commenced the camp programs with flag hoisting. All the NSS volunteers and the youth of the village did mass exercise and yoga together.

With the motto 'Environment protection is our first duty', they cleaned the Kalyani of J Byadarahalli village temple. In this program the NSS volunteers and villagers gathered very enthusiastically as if it was their house work, then the NSS volunteers went to the village houses to maintain cleanliness in the village temple Kalyani and other public places and now create awareness about health and education. At 4:30 in the evening, all the NSS volunteers left J Byadarahalli village, came back to SJBIT College campus and returned to their respective homes, after returning all the equipment's which were carried to the camp.
