I and II Semesters

SERVICE TO MANKIND IS SERVICE TO GOD

His Divine Soul Padmabhushana Sri Sri Sri Dr. Balagangadharanath MahaSwamiji Founder President, Sri Adichunchanagiri Shikshana Trust®

Belief in God is not ignorance or illusion. It is a belief that there is an unseen, ineffable Power that transcends all our powers of muscles, mind and lives.

His Holiness Parama Pujya Sri Sri Sri Dr. Nirmalanandanatha MahaSwamiji President, Sri Adichunchanagiri Shikshana Trust ®

True richness is the generosity of heart. Cultivate it and work to help the less fortunate ones in life.

Revered Sri Sri Dr. Prakashanatha Swamiji Managing Director, BGS & SJB Group of Institutions & Hospitals

People and prosperity follow the path which the leaders take. So the elders and leaders should make sure that they give the right lead and take the right path.

CET Code: E115 | COMED-K: E107 | MBA: B288 | M.Tech: T871

llabus Book	for EE Stream (ECE and EEE)						
	s for 1 st and 2 nd Semester						
	ines are provided in detail. lines are subjected to changes if any needed. timated timely.						
k is available o	n <u>www.sjbit.edu.in</u>						
please write t	o <u>academicdean@sjbit.edu.in</u>						
	UPDATES						
Date	Remarks						
09/09/2023	Pending syllabus of 2 nd SEM AEC course 23CSAE21/23EEAE21/23CVAE21/23MEAE21						
02/11/2023	Updated with pending course syllabus						
Revision 0206/11/2023More clarity in CIE & SEE guidelines of CAED course (typographical mistakes are removed) Formatting for better appearance.							
18/11/2023	Retitling of Course titles of Mathematics, Physics, chemistry, Engg. Core courses from all departments						
	Syllabus eme and guidel eme and guidel be done and int k is available o please write to 09/09/2023 02/11/2023 06/11/2023

Semester:	Ι		se Type:		C, New Demi with 2(1) a							
Course Title:	Funda	mentals	of Infini	te seri	es, Calculus and Lin	ear Algebra						
Course Code	:	23M	IAT11B			Credits:	4					
Teaching Ho	urs/We	ek (L:7	[:P:O)		3:2:0:0	Total Hours:	50					
CIE Marks:	5	0	SEE Ma	arks:	50	Total Marks:	100					
SEE Type:	The	ory				Exam Hours:	3					
I. Course Ob	jective	s:										
 Familiarize the importance of calculus associated with one variable and multivariable. Analyze the problems by applying Ordinary Differential Equations. To develop the knowledge of matrices and linear algebra in comprehensive manner. II. Teaching-Learning Process (General Instructions):												
 II. Teaching-Learning Process (General Instructions): In addition to the traditional lecture method, innovative teaching methods shall be adopted. State the need for Mathematics with Engineering Studies and Provide real-life examples. Grading assignments and quizzes and documenting students' progress. Encourage the students for group learning to improve their creative and analytical skills. 												
Pre-requi 1. Trigono 2. Differen 3. Basic k	ometric ntiation	, Integra	ation and atrix ope	ration	s.							
Modulo1. So	auonco	and Sa		. CO	URSE CONTENT		10 Hours					
Module1: Sequence and Series10 HoursSequences, Series, convergence, divergence, oscillatory conditions, properties, comparison tests, D'Alembert's ratio test, Alternating series, Absolute convergence, power series. Taylor's and Maclaurin's series expansions for one variable (statement only)-Problems.Image: Chapter: sections: Discussion and coverage of contents as suggested in articles 9.1 to 9.6, 9.9, 9.12, 9.13, 9.14 and 4.3(4), 4.4. of Textbook 1.Self Study: Cauchy's root test.Image: RBT Levels: L1, L2 and L3.												
Module-2:Sin	ngle va	riable c	alculus				10 Hours					
Polar curves	– Angl	e betwe	een the r	adius	vector and tangent,	angle between two	curves, pedal					

Polar curves – Angle between the radius vector and tangent, angle between two curves, pedal equation. Curvature and radius of curvature – Cartesian and pedal forms. Evaluation of Indeterminate forms: evaluation of limits of the form $1^{\infty}, 0^{0}, \infty^{0}$.

 Textbook: Chapter: sections: Discussion and coverage of contents as suggested in articles 4.7(1, 2), 4.8, 4.10, 4.11(1, 5), 4.5(III) of Textbook 1.

 Self Study: Radius of curvature in parametric and polar form.

 RBT Levels: L1, L2 and L3.

 Module-3:Multivariable calculus

 10 Hours

 Partial differentiation; Definition and problems, Total derivatives – Differentiation of composite functions. Jacobians-definition and problems. Taylor's and Maclaurin's series expansions for two variables (statement only)-Problems.Maxima and minima for a function of two variables.

 Textbook: Chapter: sections: Discussion restricted to derivation and problems as suggested in articles 5.2, 5.5(1, 2), 5.7 (1), 5.9, 5.11 of Textbook 1.

 Self Study:

Method of Lagrange's undetermined multipliers with a single constraint.

RBT Levels: L1, L2 and L3

Module-4: Ordinary differential equations (ODE's) of first order

Linear and Bernoulli's differential equations. Exact differential equations. Orthogonal trajectories (Cartesian form only) and Newton's law of cooling, and LR circuits. Nonlinear differential equations: Introduction to general and singular solutions; Solvable for *p* only; Clairaut's equation.

Textbook: Chapter: sections: Discussion and coverage of contents as suggested in articles 11.9 (only for introduction), 11.10, 11.11, 12.3 (1, 2), 12.5, 12.6, 11.13(1), 11.14 of Textbook 1.

Self Study:

Reducible to exact differential equations. Orthogonal trajectories – polar form.

RBT Levels: L1, L2 and L3.

Module-5:Linear Algebra

10 Hours

10 Hours

Rank of a matrix by echelon and normal form. Consistency and Solution of system of linear equations. Gauss-elimination method. Approximate solution by Gauss-Seidel method. Determination of largest Eigen values and the corresponding Eigen vector by Rayleigh's power method.

Textbook: Chapter: Sections: Discussion and coverage of contents as suggested in articles 2.7(1, 2, 7), 2.10(1), 28.6(1) 28.7(2) and 28.9of Textbook 1.

Self Study:

LU decomposition method and Gauss-Jordan method.

RBT Levels: L1, L2 and L3.

	IV. COURSE OUTCOMES
CO1	Understand convergence of infinite series.
CO2	Apply the knowledge of single variable calculus to solve the problems on polar curves and to evaluate indeterminate forms.
CO3	Apply the knowledge of partial differentiation to find the extreme value of the function and Jacobian.
CO4	Solve first-order ordinary differential equations analytically using standard methods.
CO5	Make use of matrix theory for solving the system of linear equations and compute eigen

Textbook: Chapter: sections:

Discussion and coverage of contents as suggested in articles 8.1, 8.4 to 8.8, 8.11, 8.12, 8.13, and 8.18(1, 2) of Textbook 1.

Self Study:

Stoke's theorem and Gauss divergence theorem.

RBT Levels:L1, L2 and L3

Module-3: Differential equations of higher order:

10 Hours

10 Hours

Second order linear ODE's with constant coefficients – Inverse differential operators, evaluation of homogeneous equations, Non homogeneous equations (e^{ax} , sin ax or cos ax, polynomial), method of variation of parameters, Cauchy's and Legendre homogeneous equations. Applications: LCR circuits.

Textbook: Chapter: sections: Discussion and coverage of contents as suggested in articles 13.1 to 13.6, 13.8, 13.9, 14.5 of Textbook 1.

Self study: Applications to simple harmonic motion and oscillations of a spring.

RBT Levels: L1, L2 and L3

Module-4: Numerical methods

Solution of algebraic and transcendental equations: Newton-Raphson method.

Finite Differences and Interpolation: Forward, Backward differences, Interpolation, Newton-Gregory Forward and Backward Interpolation formulae, Interpolation with unequal Intervals: Newton divided difference interpolation formula and Lagrange interpolation formula (no proof), problems. **Numerical Integration**: Simpson 1/3rd rule and Simpson 3/8th rule.

Textbook: Chapter: sections: Discussion and coverage of contents as suggested in articles 28.2(3), 29.1(1, 2), 29.6, 29.9, 29.10, 29.11, 29.12, 30.4, 30.7, 30.8 of Textbook 1.

Self study:Regula-falsi method and Trapezoidal rule.

RBT Levels: L1, L2 and L3

Module-5: Numerical Solution of Ordinary Differential Equations (ODEs):

10 Hours

Numerical solution of ordinary differential equations of first order and first degree - Taylor's series method, Modified Euler's method, Runge-Kutta method of fourth order and Milne's predictor corrector formula (No derivations),problems. Numerical solution of ordinary differential equations of second order and first degree: Milne's method.

Textbook: Chapter: sections: Discussion and coverage of contents as suggested in articles 32.3, 32.5, 32.7, 32.9, 32.12 of Textbook 1.

Self Study: Numerical solution of ordinary differential equations of second order and first degree Runge-Kutta method of fourth order.

RBT Levels: L1, L2 and L3.

	IV. COURSE OUTCOMES									
CO1	Apply the concept of change of order of integration and change of variables to evaluate									
COI	multiple integrals to find area.									
CO2	Understand the applications of vector calculus refer to Solenoidal, Irrotational vectors,									
02	line integral and surface integral.									
CO3	Analyze the solution of second and higher order ordinary differential equations.

Semester:	I/II	Co	ourse Type:			ESC						
Course Title : E	Basics of	f Civil	Engineering	,								
Course Code:		23CV	T14B/24B			Credits:	3					
Teaching Hour	s/Week	: (L:T:	P:O)		3:0:0:0	Total Hours:	40					
CIE Marks:	50)	SEE Mar	ks:	50	Total Marks:	100					
SEE Type:			The	ory		Exam Hours:	3					
	•		I. (Cou	rse Objectives:							
1. To make	students	s learn			ious fields of civil er	igineering.						
			-		he problems involvi		with their					
applications	-			,								
3. To develop the student's ability to find out the center of gravity and moment of inertia and their												
applications.												
		I. Teac	ching-Learn	ing	Process (General Ir	structions):						
II. Teaching-Learning Process (General Instructions): Chalk and talk, videos, Power Point presentation, animations.												
. COURSE CON			<u> </u>									
Module-1: Introduction To Civil Engineering 8 Hours												
INTRODUCTION TO CIVIL ENGINEERING: Scope of different fields of Civil Engineering-												
					n Technology, Geo							
					nd Irrigation Engine							
	Engine	ering.	Effect of th	ne in	frastructural facilitie	es on socio-econom	nc development					
ofa country.				CTD		1 01 11						
					UCTION: Propertie		ling material					
		• 1			alls, doors, windows	and staircases.						
Textbook: H.			-									
Self-Learning		materi	als used in c	onst	ruction							
RBT Levels:												
Module-2: Su							8 Hours					
		-	-	-	INFRASTRUCTU							
INFRASTRU	CTURE	E: Intro	oduction to s	susta	inable development	goals, Smart city c	oncept, clean					
cityconcept, Sa	afe city c	concep	ot									
ENVIRONM	ENT: B	lasic co	oncepts of v	vater	supply and sanitar	y systems, urban ai	r pollution					
					ification of Landfill							
					t buildings, recycling							
inbuildings, Se	ecurity s	systems	s; Smart buil	ding	;S.							
-		•		-	ions 3&4 Dr. Adv. H	Harshul Savla: Cha	pter					
			-		frastructure construc		L					
RBT Levels: 1			1									
Module-3: An	alysis o	of force	e systems				8 Hours					
				Co	ncept of idealization	n. system of force	s, principles of					
					n and composition of							
					oncurrent coplanar							
					am, equations of equ							
	and non- concurrent coplanar force systems – Numerical examples. Textbook : H. J Sawant: Chapter 6&8: Sections 6 & 8											

Self-Learning: Free body diagram for complex figures(3D) **RBT Levels: L1 L2 L3 Module-4: Friction and Projectiles** 8 Hours FRICTION: FRICTION: Introduction, Frictional force, Types of Friction- Static friction and Dynamic friction, Limiting friction, Laws of friction-Laws of Static friction and Laws of Dynamic friction, Angle of friction, Angle of Repose, Cone of friction, Ladder friction. Problems on Static Friction-Horizontal plane, Inclined plane, Interconnected bodies and ladder friction. PROJECTILEs: Projectile Motion, Relative motion, Numerical problems. Motion under gravity, Numerical problems. Textbook: H. J Sawant: Chapter 7&12: Sections 7 & 12Self-Learning: Pulley problems with friction **RBT Levels: L1 L2 L3 Module-5: Centroid and Moment of Inertia** 8 Hours **CENTROID:** Introduction, methods of determining the centroid, locating the centroid of simple figures from first principle, Centroid of composite and built-up sections – Numerical Examples. MOMENT OF INERTIA: Introduction, method of determining the second moment of area of plane sections from first principles, parallel axis theorem and perpendicular axis theorem section modulus, the radius of gyration, moment of inertia of composite area and built-up sections Numerical Examples. Concept of product of inertia (No problem). Textbook: H. J Sawant: Chapter 10&11: Sections 0&11 Self-Learning: Centroid & MOI for complex figures **RBT Levels: L1 L2 L3 IV.COURSE OUTCOMES** Summarize the various fields of civil engineering and importance of building materials. **CO1** Apply the knowledge of science to study the effect of force systems on the rigid bodies. **CO2 CO3** Analyse the action of force systems on the rigid bodies. **CO4** Determine the centroid and moment of inertia of regular and built-up sections. V.CO-PO-PSO MAPPING (mark H=3; M=2; L=1) PO/PSO 1 2 3 4 8 9 10 11 12 **S**1 S2 S3 S4 5 6 7 CO1 2 2 1 1 1 CO2 3 2 1 1 CO3 3 2 1 1 CO4 3 2 1 1 VI. Module-2:Electrical properties of materials 8 Hours Clectrical Properties: Review of classical free electron theory, limitations of classical free electron heory. Postulates of quantum free electron theory, Density of states (qualitative), Fermi energy, Fermi relocity, Fermi temperature, Fermi factor and its dependence on energy and temperature. Electrical conductivity (qualitative expression using effective mass and Fermi velocity). Merits of quantum free electron theory. Gemiconductor physics : Introduction to semiconductor physics, conductivity in an intrinsic											

Page **26**

semiconductor, Expression for the concentration of electrons in the conduction band and Holes concentration in valance band (only mention the expression), Fermi level in intrinsic and extrinsic semiconductors, Hall effect, Expression for Hall coefficient (derivation). Applications of Hall effect-Hall thrusters, Numerical problems

Modern Engineering Physics S.L. Guptha and Sanjeev Guptha: 19-Free electron theory and Chapter: 21-Semiconductor physics

Engineering Physics by R K Guptha and R K Gaur: Chapter: 60-Classifications of solids

Pre-requisites (Self Learning): Concepts of electric current	
RBT Levels: L1 – Remembering, L2 – Understanding, L3 – Applying,	
Module-3: Lasers and Optical fibers	8 Hours

Lasers: Interaction of radiation with matter, Einstein's coefficients (derivation of expression for energy density). Requisites of a Laser system. Conditions for Laser action. Principle, Construction, and working of semiconductor Laser. Application of Lasers in Defence (Laser range finder).

Optical Fibers: Propagation mechanism, angle of acceptance, Numerical aperture, Modes of Propagation, Types of optical fibers, Attenuation and Mention the expression for attenuation coefficient. Discussion of a block diagram of point-to-point communication, Merits, and demerits of Optical fiber, Optical fiber sensors- displacement sensor, Numerical problems.

Modern Engineering Physics S.L. Guptha and Sanjeev Guptha: 4- Lasers and Holography and Chapter: 5- Fiber Optics

Applied Physics for engineers by P K Diwan: Chapter:4- Lasers Chapter: 5 – Optical fiber Pre-requisites (Self Learning): Basic mechanism of sensors

RBT Levels: : L1 – Remembering, L2 – Understanding, L3 – Applying,									
Module-4: Maxwell's equations, Electro Magnetic waves and Dielectrics	8 Hours								

Maxwell's equations: Fundamentals of vector analysis. Divergence and curl of electric field and magnetic field (static), Gauss' divergence theorem and Stokes' theorem. Current density & equation of Continuity; displacement current (with derivation) Maxwell's equations in vacuum.

Electro Magnetic waves: The wave equation in differential form in free space (Derivation of the equation using Maxwell's equations), Plane electromagnetic waves in vacuum, their transverse nature.

Dielectric materials: Polar and non-polar dielectrics, internal fields in a solid, Clausius Mossotti equation (Derivation), Application of dielectrics in transformers, Numerical problems.

Engineering physics by G. Aruldhas: Chaptar 2: Electromagnetic theory

Engineering Physics by R K Guptha and R K Gaur: Chapter: 53-Maxwell equations and Electromagnetic waves

Pre-requisites (Self Learning): Basics of electromagnetic waves

RBT Levels: : L1 – Remembering, L2 – Understanding, L3 – Applying.

Module-5:Modern Engineering Materials	8 Hours
---------------------------------------	---------

Nano Materials: Introduction to Nano materials, Surface to volume ratio, Quantum confinement – Quantum well, Quantum wire, Quantum dot. Carbon Nano tubes, types, properties, Synthesis of carbon nano tubes - Arc discharge method, Applications.

Transmission Electron Microscopy (TEM), Scanning Electron Microscope (SEM), Application of SEM in analysis of Molecular size, Numerical problems.

Engineering physics by G. Aruldhas: Chaptar 16: Nano technology

Pre-requisites (Self Learning): Properties of materials

RBT Levels:L1 – Remembering, L2 – Understanding, L3 – Applying.

Instructions for conduction of practical part: Any Ten Experiments must be completed from the list of experiments. Each experiment to be evaluated for conduction with observation sheet and record writeup. Rubrics for the evaluation of the write-up for experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session. • Record should contain all the specified experiments in the syllabus and each experiment write-up willbe evaluated for 50 marks. • Average marks scored by the students from all the experiments are considered. • Weightage to be given for neatness and submission of record/write-up on time. • Department shall conduct 01 test for 50 marks, test shall be conducted after the completion of prescribed experiments. • In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledgewill carry a weightage of 80% and the rest 20% for viva-voce. IV.COURSE OUTCOMES CO1 Discuss the fundamental principles of Quantum Mechanics CO2 Elucidate the concepts of conductors and semiconductors CO3 Describe the principles of LASERS and Optical fibers and their relevant applications. CO4 explain basic concepts of nanoscience and technology and its applications CO5 Practice working in groups to conduct experiments in physics and perform precise and

Module-2:Corrosion Science and E-waste Management

8 Hours

Corrosion: Introduction, Electrochemical theory of corrosion, Types of corrosion - Differential metal and differential aeration (pitting and water line). Corrosion Penetration Rate (CPR), numerical problems on CPR.

Corrosion Control: Anodizing - Anodizing of Aluminium, Cathodic protection - sacrificial anode, Metal coatings – Galvanization. Electroplating-Electroplating of Cr.

E-Waste: Introduction, sources of e-waste, Composition, Characteristics, and Need of E-waste management, effects of e-waste on environment and human health, methods of disposal and its advantages. Extraction of copper and gold from e-waste.

Textbook:Chapter: Sections: E-Waste ManagementChallenges and Opportunities in India by VarshaBhagat-Ganguly: Chapter 1.4.6: Section 1.1.4.1.6.1

Engineering Chemistry by R V Gadag: Chapter 6: Section: 6.3, 6.4, 6.5, 6.6, 6.7

Pre-requisites (Self Learning): Organic coatings: Paint, components of paints and their functions. Varnish, definition, differences between paints varnishes. Impact of heavy metals on environment and human health

RBT Levels:L1,L2,L3

Module-3:Renewable and Alternate energy sources Energy Sources: Introduction, definitions of CV, LCV, and HCV determination of calorific value of solid/liquid fuel using bomb calorimeter, numerical problems.

Modern batteries- Components, battery characteristics, construction, working and applications of; i)Na-ion battery,

ii) Li-ion battery.

Super capacitors-Introduction and application in electric vehicles

Electrode System: Introduction, types of electrodes. Ion selective electrode - definition, construction, working and applications of glass electrode. Concentration cell – Definition, construction and Numerical problems

Photovoltaic cells-Introduction, Synthesis of Solar grade silicon by Union Carbide process, Construction, working and applications of photovoltaic cell

Textbook:Chapter:sections-Engineering Chemistry by R V Gadag:Chapter 1,2,3,4:Section 1.5,2.3,3.11,3.12,4.6

Pre-requisites (Self Learning): Electrodes for electrostatic double layer capacitors, pseudo capacitors, and hybrid capacitor, semiconductor, insulators and conductors

RBT Levels: L1,L2,L3

Module-4:Sensors and Display Systems

8 Hours

Sensors: Introduction to sensors and transducers. Need for sensors in the modern world. Working principle and applications of Electrochemical sensors, Thermometric sensors, and Optical sensors. Sensor for the measurement of Dissolved Oxygen (DO). Nano sensors- Introduction, properties and applications.

Display Systems: Liquid crystals (LC's) - Introduction, classification, properties and application in Liquid Crystal Displays (LCD's). Properties and application of Organic Light Emitting Diodes (OLED's) and Quantum Light emitting diodes (QLED's). Pervoskite Materials: Introduction, properties and applications in optoelectronic devices.

Textbook:Chapter: Sections: Sensors and Transducer by Ian **R.Sinclair**: Chapter 3,6,8:Section3.1,6.8,8.5

Pre-requisites (Self Learning): IR and UV-Visible spectroscopy. Disposable sensors in the detection of biomolecules, advantages of disposable sensors over classical sensors

RBT Levels: L1,L2,L3

Module-5:Nanomaterials and Analytical Techniques

8 Hours

Nanomaterials: Introduction, size dependent properties of Nanomaterials (Surface area, Catalytic, Electrical property), preparation of Nanomaterials by sol-gel, co-precipitation and CVD method with example. Introduction, properties and engineering applications of Nano fibers, Nano rods, Grapheneand CNT's.

Analytical Techniques: Introduction, principle and instrumentation of Colorimetric sensors; its application in the estimation of copper, principle and instrumentation of Potentiometric sensors; principle and instrumentation of its application in the estimation of iron, Conductometric sensors; its application in the estimation of strong acid and acid mixture.

Textbook: Chapter: sections-Engineering Chemistry by R V Gadag: Engineering Chemistry by R V Gadag:Chapter 10:section 10.2,10.3,10.4,10.5,10.6

2) Engineering Chemistry by Dr. B. Mahesh: Chapter 5:Section 5.2

Pre-requisites (Self Learning)

Properties & applications offullerenes, Nano composites, Dendrimers.

8 Hours

I. Course Objective

- This course aims at achieving fluency and confidence in spoken and written English.
- Acquiring wide range of vocabulary and linguistic competence that is required for functional performance.
- Building elementary foundations for the knowledge related to conventions and use of language in society, particularly in speaking and listening skills
- Developing the basic skills for creative reading and writing with precision

II. COURSE CONTENT

Module-1: Introduction to Communicative English

Hrs: T/4 L/1

Fundamentals of Communicative English- Barriers to Effective Communication, Different styles in Technical Communication. Interpersonal Communication Skills, Types of communication Interpersonal Communication Skills, Non-Verbal Communication Skills (Body Language), Barrier in communication, how to improve it.

Grammar Focus: Basic English Grammar, Parts of speech.

Activity: Peer- Based Exercises to Ignite conversation. Allow students to interact with each other; talk about their Special Skill, Hobbies and Passion.

Textbook: Chapter: sections: Discussion and coverage of contents as suggested in PART-01: .1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 1.11, 1.13 of textbook 1.

Pre-requisites (Self Learning): Basics Of Grammar learnt in PUC- Parts of Speech.

RBT Levels:L1, L2 and L3

Module-2: Listening Skills

Introduction to Phonetics: Sounds and Symbols of vowels, Consonants, Diphthongs, Syllables Silent and Non-Silent letters. Pronunciation of 'The', Homophones and Homonyms.

Importance Of Listening: Difference between Hearing and Listening, Active Listening, Types of Listening, Barriers in Listening, Note taking, Active response, Empathy and Perspective- taking, Building Listening Habits.

Activity: Scenario – Based Activity

Hrs: T/4 L/1

Textbook: Chapter: sections: Discussion and coverage of contents in **Part -02**: 7.1, 7.2, 7.6, 8.7. **Part-03**: 9.1, 9.2, 9.3, 9.4, 9.5, 9.6, 9.7, 9.8, 9.9, 9.10, 9.11, 9.12 of textbook 01.

Pre-requisites (Self Learning): Audio Track listening such as Podcasts, Audio Books, Language Learning to improve Pronunciation, Comprehension and over all Language Skills. **RBT Levels:**L1, L2 and L3

Module-3: Introduction to Speaking Skills

Hrs: T/4 L/1

Developing Vocabulary, Paraphrasing conversations, Paraphrasing content, Common Errors in Pronunciation. Importance of Non verbal communication [Body Language, Para linguistic features] Presentations on a various themes by organizing a larger unit of discourse and giving information and Expressing opinions, Group Discussions: Significance of GD and Do's & Don'ts. Assertive Communication skills, Answering to the Point following 7C's of communication. Extempore and Public Speaking.

Grammar focus: Reported Speech, Voice, One -word Substitution, Prefix and Suffix. Activity: GD

Textbook : Chapter: sections: Discussion and coverage of contents in

Part- 04: 10.1, 10.2, 10.3, 11,1, 11.2, 11.3, 12, 13 of textbook 01.

Pre-requisites (Self Learning)

Basic English Grammar, Pronunciation, Speaking on general topics

RBT Levels: L1, L2 and L3

Module-4: Introduction to Reading Skills

Hrs: T/4 L/1

Types of reading [Skimming, and Scanning, Extensive and intensive reading], Oral skills with emphasis on conversational practice. Reading Comprehension. Analytical and Comparative Reading, Usage of Dictionary.

Reading Job advertisements, understanding Job specifications, requirements in application form [Job or for higher studies].

Grammar focus: Subject verb agreement, use of Active verbs, Sequence of Tenses.

Activity: Book review [Fiction& Non- Fiction], News Paper article reading, Magazine and Journals review.

Textbook: Chapter: sections: : Discussion and coverage of contents in

PART-05: 17.1, 17.2, 17.3, 17.7, 17,8, 17.9, 17.10, of textbook 01.

Pre-requisites (Self Learning): Basic Reading skills.

RBT Levels: L1, L2 and L3

Module-5: Introduction to Writing Skills

Hrs: T/4 L/1

Techniques in Paragraph Writing, Organizing Principles of Paragraphs in Documents, Report writing; Long and Short, Punctuations, Emails, Blog writing, Resume and Cover Letter writing. **Grammar focus :** Misplaced Modifiers, Idioms and Phrases

Activity: Students write a short Article and Report on Recent Technological Innovations.

Textbook: Chapter: Sections: Discussion and coverage of contents in

Part-06: 20, 20.1, 20.2, 20.3, 20.4, 22.7, 23.5, 23.13, 25.1, 25.2, 25.3, 25.6, of textbook 01.

Pre-requisites (Self Learning): Basic English Grammar, Vocabulary.

RBT Levels: L1, L2 and L3

III. COURSE OUTCOMES

CO1 Develop the ability to speak English language with the right way of pronunciation.

CO2 Practice listening effectively to communication in English.

DATE:

Autonomous Institute affiliated to Visvesvaraya Technological University, Belagavi Accredited by NAAC with 'A+'grade, Certified by ISO 9001 - 2015 Recognized by UGC, New Delhi with 2(f) & 12 (B)

Semester:	II	Course	Type:	AEC	,					
Course Title:	Course Title: INTRODUCTION TO PYTHON PROGRAMMING {Skill Development Course-2 (EWDP)}									
Course Code: 23EEAE21					Credits:	1				
Teaching Hours/Week (L:T:P:O)			0:1:1:1	Total Hours:	40					
CIE Marks	: 50	50 SEE Marks:		50	Total Marks:	100				
SEE Type: Theory/practical/other assessment(practical) Exam Hours:						02				

I. Course Objectives:

- Learn the syntax and semantics of the Python programming language.
- Illustrate the process of structuring the data using lists, tuples.
- Demonstrate the use of built-in functions to navigate the file system.
- Implement the Object-Oriented Programming concepts in Python.

II. Teaching-Learning Process (General Instructions):

These are sample Strategies, which teachers can use to accelerate the attainment of the various course

outcomes.

- 1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.
- 2. Use of Video/Animation to explain functioning of various concepts.
- 3. Encourage collaborative (Group Learning) Learning in the class.
- 4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- 5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analysed information rather than simply recall it.
- 6. Introduce Topics in manifold representations.
- 7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.
- 8. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students' understanding.

III. COURSE CONTENT

Module-1

8 Hours

Python Basics: Difference between basic programming Language and Python, Python History, Python Operators and Operator Precedence, Keywords & Identifier, Statements & Comments, Python Data types.

Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods,

Example.

Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things.

Textbook 1: Chapter 1-3

Pre-requisites (Self Learning)

RBT Levels: L1 and L2

Module-2:

8 Hours

8 Hours

Flow control: Python if...else, Python for and while Loop, break, Continue and Pass Statement.

Functions: def Statements with Parameters, Return Values and return Statements, The None Value, Keyword Arguments and print(), Local and Global Scope, The global Statement, Exception Handling.

Textbook 1 : Chapter 2 (2.1 to 2.1

Pre-requisites (Self Learning) : HTML

RBT Levels:L1, L2

Module-3:

Manipulating Strings: Working with Strings, Useful String Methods.

Exception Handling: Common Exceptions, User-defined Exception Declaring multiple Exception, Raising Exception, Python Directory.

Textbook 1 : Chapter 6, 8

Pre-requisites (Self Learning) ; HTML

RBT Levels: L2, L3

Module-4:

File handling: Reading from a file, writing to a file, Reading and writing CSV file Reading and writing Excel file, Python Classes, Python Objects, Operator Overloading.

Python Modules: Create Module and Standard module.

Textbook 1: Chapter 9-10

Pre-requisites (Self Learning) : HTML and CSS

RBT Levels: L2, L3

Module-5:

8 Hours

8 Hours

Classes and objects: Inheritance, Multiple Inheritance, Python Namespace, Programmer-defined types.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, Theinit method, The_str__ method, Operator overloading, Type-based dispatch.

Text Book 2 : Chapter 15-17

Pre-requisites (Self Learning) :

RBT Levels: L3

IV. COURSE OUTCOMES

SCHEN	AE:	2023										DAT	ΓE:

Formative (Successive) Assessments: Assignments/quiz/ seminars/field survey and report presentation/course project/etc. based on the faculty & dept. planning

Practical Conduction: The conduction of each experiment/program per week should evaluate for 50 Marks and average of all shall be taken.

In case of Integrated course, minimum eligibility shall be attained as prescribed in both the theory and practical components.

Self Learning Courses (SLC) Courses, Internship, Mini project & Major Project: Rubrics & Methodology shall be defined seperately

BGS Health and Education City, Dr. Vishnuvardhana Road, Kengeri, Bengaluru-560060 Approved by AICTE, New Delhi.

Autonomous Institute affiliated to Visvesvaraya Technological University, Belagavi Accredited by NAAC with 'A+'grade, Certified by ISO 9001 - 2015 Recognized by UGC, New Delhi with 2(f) & 12 (B)

CIE and SEE guidelines based on course Type for Autonomous Scheme 2023

Note:

- > The CIE conduction coordination will be done by the office of Controller of Examination (COE).
- > The SEE will be conducted by the office of Controller of Examination (COE).

Continuous Internal Evaluation (CIE)	Semester End Examination (SEE)	Final Passing requirement
1. BSC/ESC/PCC/ ETC/PEC/OEC – Theory Course (03 &	04 Credit courses)	
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Sen	nester End Exam (SEE) is 50%.	
The minimum passing mark for the CIE is 50% of the maximum marks (25	The minimum passing mark for SEE is 40%	The student is declared
marks out of 50).	of the maximum marks (20 out of 50 marks).	as a pass in the course
		if he/she secures a
Continuous Internal Evaluation:	Semester-End Examination:	minimum of 45% (45
CIE will be conducted by the department and it will have only 01	Duration of 03 hours and total marks of 100.	marks out of 100) in
component:		the sum total of the
I. Theory component.	• The question paper will have ten questions.	CIE and SEE taken
Theory Component will consist of	Each question is set for 20 marks.	together.
A. Internal Assessment Test	• There will be 2 questions from each	
B. Formative assessments	module. Each of the two questions under a	
	module (with a maximum of 3 sub-	
A. Internal Assessment Test:	questions), should have a mix of topics	
• There are 03 tests each of 50 marks conducted during 6 th week, 10 th	under that module.	
week & 15 th week, respectively.		

 The question paper will have four questions (max of 3 sub questions) from the notified syllabus. Each question is set for 25 marks. The student have to answer 2 full questions (one from 1st & 2nd questions and another from 3rd & 4th question). Internal Assessment Test question paper shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course. 	 The students have to answer 5 full questions, selecting one full question from each module. Marks scored shall be proportionally reduced to 50 marks.
 B. Formative assessments: 02 formative assessments each of 50 marks shall be conducted by the course coordinator based on the dept. planning during random times. One formative assessment shall be completed before 5th week and second shall be completed before 12th week. The syllabus content for the formative assessment shall be defined by the course coordinator. The formative assessments include Assignments/ Quiz/ seminars/case study/field survey/ report presentation/ course project/etc. The assignment QP or Quiz QP shall indicate marks of each question and the relevant COs & RBT levels. The rubrics required for the other formal assessments shall be defined by the departments along with mapping of relevant COs & POs. 	
The final CIE marks will be 50: Average of all 05 events of Internal Assessment test and formative assessments.	
The documents of all the assessments shall be maintained meticulously.	

2. IBSC/IESC/IPCC – Integrated with Theory & Practical (04 credit courses)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Sen	nester End Exam (SEE) is 50%.	
 The minimum passing mark for the CIE is 50% of the maximum marks (25 marks out of 50). Minimum eligibility of 50% marks shall be attained separately in both the theory component and practical component. Continuous Internal Evaluation: CIE will be conducted by the department and it will have 02 component: Theory Component. Practical Component. I. Theory Component will consist of Internal Assessment Test Formative assessments (Not required for Integrated courses) A. Internal Assessment Test: The question paper will have four questions (max of 3 sub questions) from the notified syllabus. Each question is set for 25 marks. It is suggested to include questions on laboratory content in the Internal Assessment Test Question papers. The student have to answer 2 full questions (one from 1st & 2nd questions and another from 3rd & 4th question). Internal Assessment Test question paper shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.	 The minimum passing mark for SEE is 40% of the maximum marks (20 out of 50 marks). Semester-End Examination: Only theory SEE for duration of 03 hours and total marks of 100. The question paper will have ten questions. Each question is set for 20 marks. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), should have a mix of topics under that module. The laboratory content must be included in framing the theory question papers. The students have to answer 5 full questions, selecting one full question from each module. Marks scored shall be proportionally reduced to 50 marks. No Practical SEE for Integrated Course. Note: CAED Course shall not be considered here, it shall be considered as in sl. No. 3 in the next row	The student is declared as a pass in the course if he/she secures a minimum of 45% (45 marks out of 100) in the sum total of the CIE and SEE taken together.

	• Students can pick one question	
	(experiment/program) from the questions	
	lot prepared by the internal /external	
	examiners jointly.	
	• Evaluation of test write-up/ conduction	
	procedure and result/viva will be conducted	
	jointly by examiners.	
	• General rubrics suggested for SEE:	
	writeup-20%, Conduction procedure and results -60%, Viva-voce 20% of maximum	
	marks.	
	Change of experiment is allowed only once	
	and shall be assessed only for 85% of the	
	maximum marks.	
5. AEC: Ability Enhancement Courses (01 credit courses)		
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Ser	nester End Exam (SEE) is 50%.	
The minimum passing mark for the CIE is 50% of the maximum marks (25	The minimum passing mark for SEE is 40%	The student is declared
marks out of 50).	of the maximum marks (20 out of 50 marks).	as a pass in the course
		if he/she secures a
Continuous Internal Evaluation:	Semester-End Examination:	minimum of 45% (45
CIE will be conducted by the department and will have only 01 component:	Theory SEE will be conducted by COE as per	
I. Theory component.	the scheduled timetable for duration of 02	the sum total of the
Theory Component will consist of	hours and total marks of 50.	CIE and SEE taken
A. Internal Assessment Test		together.
B. Formative assessments	• Multiple choice Question paper.	
	• The students have to answer all questions.	
A. Internal Assessment Test:		
• There are 02 tests each of 50 marks conducted during 6 th week & 15 th week, respectively.		
• The question paper will be of Multiple-Choice Questions (MCQ).		
• The student have to answer all questions.		
• Internal Assessment Test question paper shall be designed to attain the		
different levels of Bloom's taxonomy as per the outcome defined for		
the course		

B. Formative assessments:		
•01 formative assessments of 50 marks shall be conducted by the Course coordinator based on the dept. planning before 14 th week.		
• The formative assessments include Assignments/seminars/case		
study/field survey/ report presentation/course project/etc.		
• The assignment QP shall indicate marks of each question and the		
relevant COs & RBT levels.		
• The rubrics required for the other formal assessments shall be defined		
by the departments along with mapping of relevant COs & POs.		
The final CIE marks will be 50:		
Average of all 03 events (02 Internal Assessment test and 01 formative		
assessment).		
The documents of all the assessments shall be maintained meticulously.		
6. HSMC: (01 credit course)		
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Ser	nester End Exam (SEE) is 50%.	
The minimum passing mark for the CIE is 50% of the maximum marks (25	The minimum passing mark for SEE is 40%	The student is declared
marks out of 50).	of the maximum marks (20 out of 50 marks).	as a pass in the course
		if he/she secures a
Continuous Internal Evaluation:	Semester-End Examination:	minimum of 45% (45
CIE will be conducted by the department and will have only 01 component:	Theory SEE will be conducted by COE as per	marks out of 100) in
	the scheduled timetable for duration of 02	the sum total of the
I. Theory component.	hours and total marks of 50.	CIE and SEE taken
Theory Component will consist of		together.
A. Internal Assessment Test	• Multiple choice Question paper.	
B. Formative assessments	• The students have to answer all questions.	
	• Marks scored shall be proportionally	
A. Internal Assessment Test:	reduced to 50 marks.	
• There are 02 tests each of 50 marks conducted during 6 th week & 15 th		
week, respectively.		
• The question paper will be of Multiple-Choice Questions (MCQ).		
• The student have to answer all questions.		

 Internal Assessment Test question paper shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course B. Formative assessments: 01 formative assessments of 50 marks shall be conducted by the faculty based on the dept. planning before 14th week. The formative assessments include Assignments/seminars/case 		
 The formative assessments include russignments seminars/case study/field survey/ report presentation/course project/etc. The assignment QP shall indicate marks of each question and the relevant COs & RBT levels. The rubrics required for the other formal assessments shall be defined by the departments along with mapping of relevant COs & POs. 		
The final CIE marks will be 50: Average of all 03 events (02 IA test and 01 formative assessment). The documents of all the assessments shall be maintained meticulously.		
7. HSMC: (0 credit courses)		
The weightage is only for Continuous Internal Evaluation (CIE).		
The minimum passing mark for the CIE is 50% of the maximum marks (25 marks out of 50).	 No Semester End Examination. 	The student is declared as a pass in the course if he/she secures a
Continuous Internal Evaluation: CIE will be conducted by the department and it will have only 01		minimum of 50% (25 marks out of 50) in the
component:		CIE.
I. Theory component. Theory Component will consist of		
C. Internal Assessment Test		
D. Formative assessments		
A. Internal Assessment Test:		
• There are 02 tests each of 50 marks conducted during 6 th week & 15 th week, respectively.		
• The question paper will be of Multiple-Choice Questions (MCQ).		
• The student have to answer all questions.		

• Internal Assessment Test question paper shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course		
 B. Formative assessments: 01 formative assessments of 50 marks shall be conducted by the faculty based on the dept. planning during random times. The formative assessments include Assignments/seminars/case study/field survey/ report presentation/course project/etc. The assignment QP shall indicate marks of each question and the relevant COs & RBT levels. The rubrics required for the other formal assessments shall be defined by the departments along with mapping of relevant COs & POs. The final CIE marks will be 50 = Average of all 03 events (02 IA test and 01 formative assessment). 		
The documents of all the assessments shall be maintained meticulously. 8. NCMC: (0 credit course)		
 The weightage is only for Continuous Internal Evaluation (CIE). The minimum passing mark for the CIE is 50% of the maximum marks (25 marks out of 50). Continuous Internal Evaluation: CIE will be conducted by the department and it will have only 01 component: I. Theory component. Theory Component will consist of only 01 assessment A. Internal Assessment Test (not required for NCMC course). B. Formative assessments. 	• No Semester End Examination.	The student is declared as a pass in the course if he/she secures a minimum of 50% (25 marks out of 50) in the CIE.
 B. Formative assessments: 01 formative assessments of 50 marks shall be conducted by the faculty based on the dept. planning during random times. The formative assessments include Quiz/Assignments/seminars/case study/field survey/ report presentation/course project/etc. The assignment QP shall indicate marks of each question and the relevant COs & RBT levels. 		

• The rubrics required for the other formal assessments shall be defined by the departments along with mapping of relevant COs &	
POs.	
The final CIE marks will be 50	
The documents of all the assessments shall be maintained meticulously.	

Program Outcomes (POs)- Graduate Attributes

Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. **Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. **Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

9. Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change
