SCHEME & SYLLABUS BOOKLET

2023 - SCHEME- [UG]

3RD & 4TH SEMESTER

SERVICE TO MANKIND IS SERVICE TO GOD

His Divine Soul Padmabhushana Sri Sri Sri Dr. Balagangadharanath MahaSwamiji

Founder President, Sri Adichunchanagiri Shikshana Trust®

"Life needs mundane knowledge Salvation needs spiritual knowledge They together banish our pervading ignorance"

His Holiness Parama Pujya Sri Sri Sri Dr. Nirmalanandanatha MahaSwamiji

President, Sri Adichunchanagiri Shikshana Trust ®

"Every youth wants to be unique - that is you!"

Revered Sri Sri Dr. Prakashanatha Swamiji

Managing Director, BGS & SJB Group of Institutions & Hospitals

"Knowledge gives discipline, from discipline comes worthiness, from worthiness one gets wealth, from wealth (one does) good deeds, from that (comes) joy."

Department Vision and Mission

Vision

To become a center of excellence and a platform in diversified fields for the aspirants in Mechanical Engineering

Mission

MI: To impart comprehensive education in the field of Mechanical Engineering to produce highly accomplished graduates

M2: To endow technical & soft skill trainings to foster professionalism and ethical values among students M3: To induce innovative thinking among students through projects and research work

3RD & 4TH SEMESTER

SCHEME & SYLLABUS

Autonomous Institution affiliated to Visvesvaraya Technological University, Belagavi Recognized by UGC, New Delhi with 2(f) & 12 (B), Accredited by NAAC with 'A+'grade, Certified by ISO 9001 - 2015

2023 Scheme - UG Syllabus for 3rd & 4th Semester The syllabus, scheme and guidelines are provided in detail. The syllabus, scheme and guidelines are subjected to changes if any needed. The updates will be done timely. Regularly access the institution website for the updated information. The Syllabus book is available on www.sjbit.edu.in For any queries, please write to academicdean@sibit.edu.in **UPDATES** Release / **Date** Remarks Revision 03/09/2024 Release First release Version 2 Changed CIE and SEE Guidelines 10/02/2025

BSC: Basic Science Course; PCC: Professional Course; IPCC: Integrated Professional Core Course; PCCL: Professional Core Course Laboratory; AEC: Ability Enhancement Course;

{I.E.-Industry Experts};

{ @ - Compulsory one activity }.

PBL: project Based learning; ABL: Activity Based Learning; SL: Self-Learning

ETC (Emerging Technology Course):

For ETC (L:T:P:O) can be plaanned by the depts considering practicality & possibility of conduction, same shall be indicated along with course title in the list, if altered than above. If planned altering the prescription, the same shall be approved at the department BOS & authorities. Atleast one activity is mandatory during the delivery of the course. The guidelines is applicable to all the semesters III to VI semesters (ETC-1 to ETC-4).

NCMC (Non Credit Mandatory Course): The following guidelines are applicable for the course type series-4 as mentioned above.

- 1) All students must register for any one of the course with the department during the first week of the III semester.
- 2) Once registered for a course in the III semester, the student shall continue and complete the same course in the remaining semesters. No provision for changing the courses after registration.
- 3) Activities shall be carried out by the students between III semester to VI semester (for 4 semesters).
- 4) The activities shall be organized, executed and monitored by the concerned department as mentioned above in coordination with the department level course coordinators. The same shall be reflected in the calendar of events of the above concerned departments.
- 5) Successful completion of the registered course and requisite CIE score (PP) is mandatory for the award of degree.
- 6) These courses are not considered for vertical progression, calculation of SGPA & CGPA, however it is mandatory for the award of degree.
- 7) The guidelines is applicable to all the remaining IV to VI semesters.

Additional courses for Lateral Entry students:

- 1) The lateral entry students getting admitted from the 2nd year of programme, shall register, study and complete additional courses prescribed & offered time to time.
- 2) Successful completion of the registered course and requisite CIE score (PP) is mandatory for the award of degree.
- 3) These courses are not considered for vertical progression, calculation of SGPA & CGPA, however it is mandatory for the award of degree.

Self-Learning Courses (SLC) as per the VIII Semester ST&E:

- 1) Offering and Registration of Self-learning Courses will commence from 3rd Semester itself and continues till the end of the duration of study.
- 2) Both regular & lateral entry students shall start registering for the self learning courses and complete as per the guidelines published separately. (Refer to the Self Learning Courses guidelines published).
- 3) These courses are not considered for vertical progression.
- 4) Calculation of SGPA & CGPA is considered for VIII Semester, irrespective of period or time of completion of the course.

	Emerging Technology Course - 1

Academic Dean Principal

Autonomous Institution affiliated to Visvesvaraya Technological University, Belagavi Recognized by UGC, New Delhi with 2(f) & 12 (B), Accredited by NAAC with 'A+'grade, Certified by ISO 9001 - 2015

Guidelines for Self-learning courses - Under Graduation (UG)

- As per the Scheme of Teaching & Examinations (ST&E) the UG students to earn totally 06 credits by studying and completing 02 NPTEL/SWAYAM courses of 12 weeks each earning 03 credits.
- The credits so earned by successful completion of the courses will be credited in the 8th SEM grade card.
- 3) The successful completion of the courses means earning of the course completion certificates from NPTEL/SWAYAM.
- 4) The courses shall be studied and completed starting from 3rd Semester and shall be completed before the announcement of 8th Semester End Examinations. However, it is advised to complete both the courses before the 7th SEM of their graduation.
- 5) The respective department BOS shall identify the professional courses related to the respective discipline either core or multidisciplinary from the list of courses released by NPTEL/SWAYAM every season. At least ten such courses shall be identified and finalized after the discussions in the respective BOS meetings, and the list shall be approved by the Academic Dean.
- 6) The approved list shall be published by the departments to the students at the beginning of the 3rd SEM itself and the student shall be given an option to choose up to 02 courses for the study and earn certificates of completion.
- 7) The practicing of studying and completion of NPTEL/SWAYAM courses starting from 3rd SEM itself has multi-fold effect:
 - i) Enhances the self-learning ability of the students.
 - ii) Study of self-learning courses will have impact on the learning of other courses in the scheme of teaching & examinations.
 - iii) Will address the real time challenges/difficulties/differences in the calendars of NPTEL/SWAYAM & Institution.
- 8) The respective departments shall make holistic efforts to bring awareness to the students about the objectives and importance of self-learning courses. The departments shall thrive towards fulfilment of the objectives.
- 9) The departments shall continuously monitor & track the progress of the accomplishment of the courses by the students.
- 10) The departments shall assign course mentors as per the guidelines of the NPTEL/SWAYAM.

- 11) The departments shall take care that the registered courses and the examinations shall be under the local chapter of the Institution.
- 12) Every care must be taken by the departments to guide, motivate, to help the students in completing the courses as the academic calendar of the institution and the calendar of the NPTEL/SWAYAM does not match. The faculty advisory system or Mentor System must play a significant role.
- 13) Every season new courses may be added to the identified list and a fresh list of courses shall be prepared based on the list announced by the NPTEL/SWAYAM every season. However, the courses published from the first list shall be maintained if the NPTEL/SWAYAM list has the courses.
- 14) If the students are unable to successfully complete the course, they shall be given an option to re-register for the same course multiple times if the courses are available during the respective seasons in NPTEL/SWAYAM list.
- 15) An option for making fresh choice shall be given to the students until the successful completion of the courses and earning of required number of credits within the defined time.
- 16) The list of students registered for the courses and completion of the courses shall be submitted to the dean office on completion of every season.
- 17) All the regulations such as "Dropping of courses", "Withdrawal of Courses", etc. as described in the academic regulations shall be applicable to the Self Learning Courses (SLC).
- 18) The performance of the students in the assignments and the certification exam of the NPTEL/SWAYAM shall be considered for awarding the grade points to the students in the self-learning courses.
- 19) If the students are successfully completing more than the prescribed number of courses in their period of study, best performed courses (group wise) may be considered for the award of credits.
- 20) The CIE & SEE marks as prescribed in the Scheme of Teaching & Examinations (ST&E) shall be considered as per the performance of the student in the successfully completed NPTEL/SWAYAM course. The obtained assignment marks in the successfully completed NPTEL/SWAYAM course shall be mapped to the CIE and obtained exam certification percentage in the successfully completed NPTEL/SWAYAM course shall be mapped for SEE marks.
- 21) The students unable to complete the self-learning courses and earn the required credits will not be awarded the degree. Degree shall be awarded only after successful completion and earning of credits.

I. Course Objectives:

- To develop proficiency in solving ordinary and partial differential equations arising in engineering applications, using numerical methods.
- Partial differential equation in Vibration theory, fluid dynamics, Heat transform and thermodynamics.
- Analyze and Solve programming Module of real life situations learn about applications transportation and assignment problems
- Vector integration and applied to problem in Fluid mechanics.

II. Teaching-Learning Process (General Instructions):

- 1. In addition to the traditional lecture method, innovative teaching methods shall be adopted.
- 2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
- 3. Grading assignments and quizzes and documenting student's progress.
- 4. Encourage the students for group learning to improve their creative and analytical skills.

III. COURSE CONTENT III (A) Theory Part

Module-1: Numerical Solution of Partial Differential Equations

Hrs: 8

Classification of second –order partial differential equations, finite difference approximations to derivatives, Solution of Laplace's equation using standard five –point formula. Solution of Heat equation by Schmidt explicit formula and Crank-Nicholson method, Solution of the Wave equation. Problems.

Text Book 1:Chapter 33-[Section 33.3, 33.4, 33.7, 33.8, 33.10 to 33.13]

C 10 T	C 1 4 P T	n • 4•	• 4 1 1	100 1 10 1
Valt I garning	Solution of I	PAICCAN AAIIATIANC	nging glandard	five point formula.
our Learning.	Soludon of 1	i vissvii tuuauviis	using stanuaru	HIVE DUME TULMUIA.

RBT Levels:L1, L2 and L3

Module-2:Linear Programming Problems [LPP]

Hrs: 8

General Linear programming problem, Canonical and standard forms of LPP. Basic feasible Solution, Optimal Solution, Simplex Method-problems. Artificial variables, Big –M method, Two-Phase method problems.

Textbook 1:Chapter: 34-[sections: 34.5, 34.6, 34.7, 34.8 34.9]

Self Learning: Formulation of an L.P.P and Optimal solution By Graphical method.

RBT Levels:L1, L2 and L3

Module-3: Transformation and Assignment Problems

Hrs: 8

Formulation of transportation problems, Methods of finding intial basic feasible solutions by North-west corner method, Least codt method, Vogel approximation method. Optimal solution – Problems. Formation of assignment problems, Hunagarian Method –problem.

Textbook 1:Chapter: 34-[sections: 34.14 , 34.15 , 34.17]

Self Learning: Degeneracy in Transportation problem.

RBT Levels: L1, L2 and L3

Module-4: Vector integration& Applications.

Hrs:8

Line integrals-definition and problems, surface and volume integrals definition, Green's theorem in a plane, Stokes theorem (without proof) and problems. Application to problems in Fluid Mechanics, Continuity equations, Streamlines, Equations of motion.

Textbook 1: Chapter: 8-[sections: 8.10 to 8.17] of Text Book 1 Chapter 35-[35.2 to 35.5]

Self Learning: Gauss-divergence

RBT Levels: L2 and L3

Module-5:Statistical methods

Hrs:8

Principles of least squares, Curve fitting by the method of least squares in the form y = a + bx, $y = a + bx + cx^2$, and $y = ax^b$. Correlation, Coefficient of correlation, Lines of regression, rank correlation.

Textbook 1:Chapter: 24[sections:24.5, 24.6] of Text Book 1 Chapter 25[Section:25.12 to 25.14, 25.16]

Self Learning: Angle between two regression of lines and problems.

RBT Levels: L1, L2 and L3

III(B) PRACTICAL PA

	PRACTICAL PART									
Sl.No	Experiments									
1	Write a program to find Laplace's equation using standard five –point formula.									
2	Write a program to find Heat equation by Schmidt explicit formula and Crank-Nicholson method									
3	Write a MATLAB script to perform the simple method using the Big M method Test your script using the following examples Input the information manually Use inf (infinity in MATLAB) for the value of M Show the progress at each iteration Show the final solution Example 1 :Solve the following problem using the Big M method. max: $z = 3x1 + 2x2 + 6X3$ Subject to $4x1 + x2 + x3 = 100 X1 + x2 > 40 X2 + x3 < 30$ Example 2 : Solve the following problem using the Big M method. max: $z = 4x1 + 5x2 - 3x3$ Subject to $X1 + 2x2 + x3 = 10 X1 - X2 + 26 X1 + 3x2 + x3 = 14$									
4	Write a MATLAB script to solves the following linear programming problem using the two-phase simplex algorithm: Max $Z = 3x1 + 5x2$ subject to $x1 \le 4$ $3x1 + 2x2 \ge 18$ $2x2 \le 12$ with $x1, x2, \ge 0$

VII(d): Activity Based Learning

Assignments, Quiz, Presentation.

Semester:	III	Cour	rse Type:	PCC					
Course Title: THERMODYNAMICS									
Course Code:	231	МЕТ30)2	Credits:	Credits: 3				
Teaching Hours/	Week (L:T:P:	(O)	2:2:0:0	Total Hours:	40			
CIE Marks:	50)	SEE Marks:	50	Total Marks:	100			
SEE Type: Theory					Exam Hours:	3 Hours			

I. Course Objectives:

This course will enable students to:

- State the governing laws of Thermodynamics and entropy.
- Explain the concepts and principles of pure substances.
- Describe gas power cycles used in prime movers and vapour power cycles used in power plants.
- Describe working principle of refrigeration and air conditioning system.

II. Teaching-Learning Process:

- Chalk and talk
- Power point presentations and Video demonstrations.
- Arrange visits to show the working models & processes.
- Adopt collaborative (Group Learning) Learning in the class.
- Adopt Activity Based Learning (ABL), which foster students' Analytical skills and develops thinking skills.

III. COURSE CONTENT

III (a). Theory PART

Module-1: Fundamental Concepts, work and Heat

8 Hrs

Fundamental Concepts: Thermodynamic definition and scope, Microscopic and Macroscopic approaches. Characteristics of system boundary, surrounding and control surface, examples. intensive, extensive thermodynamic properties, Thermodynamic state, state point, state diagram, path and process, quasi-static process, cyclic and non-cyclic; processes; Thermodynamic equilibrium, Zeroth law of thermodynamics.

Work and Heat: definition of work and its limitations. Sign convention. Displacement work, expressions for displacement work in various processes through p-v diagrams Problems. Definition of heat and mode of heat transfer.

Fundamental Concepts – Text book: 1, Chapter: 1, sections: 1.1 to 1.15 Fundamental Concepts – Text book: 2, Chapter: 1, sections: 1.1 to 1.12

Work and Heat – Text book:1, Chapter:3, sections: 3.1 to1.10

Pre-requisites (Self Learning): Basic knowledge of Energy

RBT Levels: L1, L2,L3

Module-2: Second Law of Thermodynamics and Entropy

8 Hrs

First Law of Thermodynamics: Joules experiments, equivalence of heat and work. Statement of the First law of thermodynamics, extension of the First law to non - cyclic processes, energy, energy as a property, modes of energy, steady flow energy equation(SFEE), important applications.

Second Law of Thermodynamics: Limitations of first law of thermodynamics, heat engine and heat pump: Schematic representation, efficiency and COP. Kelvin - Planck statement of the Second law of Thermodynamics; PMM I and PMM II, Clausius statement of Second law of Thermodynamics, Equivalence of the two statements, Carnot cycle, Carnot principles. Problems

First Law of Thermodynamics –Text book:1, Chapter:4 &5, sections: 4.1 to1.9 & 5.1 to 5.8

Second Law of Thermodynamics – Text book:1, Chapter:6, sections: 6.1 to 6.18 Second Law of Thermodynamics – Text book:2, Chapter:6, sections: 6.1 to 6.11

Pre-requisites (Self Learning): Basic knowledge of Heat interaction

RBT Levels: L1, L2,L3

Module-3: Entropy and Pure Substances

8 Hrs

Entropy: Clausius inequality, Statement- proof, Entropy- definition, a property, change of entropy, entropy as a quantitative test for irreversibility, principle of increase in entropy, entropy as a coordinate. **Pure Substances:** P-T and P-V diagrams, triple point and critical points. Sub-cooled liquid, saturated liquid, mixture of saturated liquid and vapor, saturated vapor and superheated vapor states of pure substance with water as example. Enthalpy of change of phase (Latent heat). Dryness fraction (quality), T-S and H-S diagrams, Throttling calorimeter, separating and throttling calorimeter. Problems.

Entropy - Text book:1, Chapter:7, sections: 7.1 to 7.16 Entropy - Text book:2, Chapter:7, sections: 7.1 to 7.13

Pure Substances - Text book:1, Chapter:9, sections: 9.1 to 9.9 Pure Substances - Text book:2, Chapter:3, sections: 3.1 to 3.8

Pre-requisites (Self Learning): basics of IC Engine studied in first year mechanical engineering course.

RBT Levels: L1, L2,L3

Module-4: Vapour and Gas power cycles.

8 Hrs

Vapour Power Cycles: Carnot vapour power cycle, drawbacks as a reference cycle. Simple Rankine cycle; description, T-s diagram, analysis for performance. Comparison of Carnot and Rankine cycles. Effects of pressure and temperature on Rankine cycle performance. Actual vapour power cycles. Regenerative and Reheat Rankine cycle. Problems.

Gas Power Cycles: Air standard cycles; Carnot, Otto, Diesel, p-v and T -s diagrams, description, efficiencies and mean effective pressures. Comparison of Otto and Diesel cycles. Gas turbine (Brayton) cycle; description and analysis. Regenerative gas turbine cycle. Inter-cooling and reheating in gas turbine cycles. Problems.

Vapour Power Cycles - Text book:1, Chapter:12, sections: 12.1 to 12.16 Vapour Power Cycles - Text book:2, Chapter:10, sections: 10.1 to 10.9 Gas Power Cycles - Text book:1, Chapter:13, sections: 13.1 to 13.14 Gas Power Cycles - Text book:2, Chapter:9, sections: 9.1 to 9.12

Pre-requisites (Self Learning): basics about cyclic and noncyclic process.

RBT Levels: L1, L2,L3

Module-5: Refrigeration Cycles

8 Hrs

Refrigeration Cycles: Vapour compression refrigeration system; description, analysis, refrigerating effect. Capacity, power required, units of refrigeration, COP, Refrigerants and their desirable properties, Vapour absorption refrigeration system. Steam jet refrigeration. Problems

Psychrometrics and Air-conditioning Systems: Properties of Atmospheric air, and Psychometric properties of Air, Psychometric Chart, Analysing Air-conditioning Processes; Heating, Cooling, Dehumidification and Humidification, Evaporative Cooling. Adiabatic mixing of two moist air streams. Problems.

Refrigeration Cycles - Text book:1, Chapter:14, sections: 14.1 to 14.8 Refrigeration Cycles - Text book:2, Chapter:11, sections: 11.1 to 11.9 Psychrometrics - Text book:1, Chapter:15, sections: 15.1 to 15.3 Air-conditioning - Text book:2, Chapter:14, sections: 14.1 to 14.7

Pre-requisites: Basic knowledge of Refrigeration and Air-conditioning studied in first year Mechanical engineering subject.

RBT Levels: L1, L2,L3

1	\mathbf{V}	•	Γ	U.	T	R	S	\mathbf{E}	•	T	T	٦(Γ	n	N	1	ES	1

CO1	Analyse thermodynamics laws.
CO2	Apply thermodynamic cycles in practical applications.
CO3	Interpret the behaviour of pure substances and its application.
CO4	Analyse performance of refrigeration and air-conditioning systems.

V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)

VIII: Activity Based Learning / Practical Based Learning/Experiential learning

- 1. Visit to thermal power plant.
- 2. Demonstration of refrigeration system.
- 3. Demonstration of working of Internal Combustion engine.
- 4. Demonstration of air conditioning system.

Semester:	III Cou	rse Type: IPCC											
Course Title: MANUFACTURING TECHNOLOGY													
Course Code:	2	3MEI303		Credits:	04								
Taashing II		L (I .T.D.O)	3:0:2:0	Total Hours:	40hrs + Lab								
reaching n	ours/ wee	k (L:T:P:O)	5:0:2:0	(Theory + Lab)	slots								
CIE Marks:	50	SEE Marks:	50	Total Marks:	100								
SEE Type:		Theory		Exam Hours:	03								

I. Course Objectives:

- To provide knowledge of various casting process in manufacturing.
- To provide in-depth knowledge on metallurgical aspects during solidification of metal and alloys, also to provide detailed information about the moulding processes.
- To acquaint with the basic knowledge on fundamentals of metal forming processes and also to study various metal forming and finishing processes.
- To impart knowledge of various joining process used in manufacturing.
- To impart knowledge about behaviour of materials during welding, and the effect of process
- parameters in welding

II. Teaching-Learning Process (General Instructions):

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- 1. Encourage collaborative (Group Learning) Learning in the class
- 2. Ask at least three HOTS (Higher order Thinking) questions in the class, which promotes critical thinking
- 3. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- 4. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students' understanding.

III. COURSE CONTENT III(a). Theory PART Module-1: Introduction to basic materials used in foundry 8 Hrs

Patterns: Definition, classification, materials used for pattern, various pattern allowances and their importance.

Sand moulding: Types of base sand, requirement of base sand. Binder, Additive's definition, need and types; preparation of sand moulds. Molding machines- Jolt type, squeeze type and Sand slinger. **Study of important moulding process:** Green sand, core sand, dry sand, sweep mould, CO2mould, shell mould, investment mould, plaster mould, cement bonded mould.

Cores: Definition, need, types. Method of making cores,

Concept of gating (top, bottom, parting line, horn gate) and risers (open, blind) Functions and types.

Textbook1: Chapter 2: sections:2.1,2.2,2.4

Pre-requisites (Self Learning)

Identify materials used for pattern, preparation of sand mould and moulding process, core making and insertions

RBT Levels:L1,L2, L3	
Module-2: Melting furnaces & Casting using metal moulds	8 Hrs

Melting furnaces: Classification of furnaces, Gas fired pit furnace, Resistance furnace, Coreless induction furnace, electric arc furnace, constructional features & working principle of cupola furnace. **Casting using metal moulds**: Gravity die casting, pressure die casting, centrifugal casting, squeeze casting, slush casting, thixocasting, and continuous casting processes. Casting defects, their causes and remedies.

Textbook 1: Chapter 2: Sections 2.4, 2.7

Pre-requisites (Self Learning)

Working of different types of Melting furnaces, castings.

RBT Levels: L1,L2

Module-3: Metal forming, Metal working and Sheet metal Processes

8 Hrs

Introduction of metal forming process: Mechanical behaviour of metals in elastic and plastic deformation, stress-strain relationships, Yield criteria, Application to tensile testing, strain rate and temperature in metal working; Hot deformation, Cold working and annealing.

Metal Working Processes: Fundamentals of metal working, Analysis of bulk forming processes like forging, rolling, extrusion, wire drawing by slab method,

Other sheet metal processes: Sheet metal forming processes (Die and punch assembly, Blanking, piercing, bending etc., Compound and Progressive die), High Energy rate forming processes.

Textbook 1: Chapter 3, Section: 3.1,3.2,3.3,3.4,3.5

Pre-requisites (Self Learning)

Mechanical behaviour of metals in elastic and plastic deformation, Sheet metal forming processes.

RBT Levels: L1,L2,L3

Module-4: Joining processes

8 Hrs

Welding: Weldability, Different types of weld joints, TIG Welding & MIG Welding, Laser Beam Welding, and Friction stir welding, Explosive welding, Resistance welding, Thermit welding.

Metallurgical aspect of Welding: Metallurgical effects of welding, weld metal solidification, formation of different weld zones, Weld cracking, Corrosion of weld, defects in welding & remedies.

Textbook 2: Chapter 30,31 Section: 30.9,30.10, 31.1,31.2,31.3,31.4,31.5,31.6, 31.7,31.8

Pre-requisites (Self Learning);

Metallurgical aspect of Welding and different types of welding

RBT Levels: L1, L2, L3

Module-5: Finishing processes

8 Hrs

Lapping And Honing Operations – Principles, arrangement of set up and application.

Super Finishing Process: Polishing, buffing operation and application.

Broaching Machine - Principle of broaching. Details of a broach. Types of broaching machines-constructional details, applications, advantages and limitations.

Textbook 2: Chapter 24,26 Section :24.4,26.7

Pre-requisites (Self Learning)

Lapping, honing, super finishing, Broaching operations

RBT Levels: L1,L2

III(b). PRACTICAL PART

Sl. No.	Experiments / Programs / Problems (insert rows as many required)
1	Preparation of sand specimens and conduction of the following tests: Compression, Shear and Tensile tests on Universal Sand Testing Machine.
2	To determine permeability number of green sand, core sand and raw sand.

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Metal Casting: Design pattern/core for a given component drawing and develop a sand mould with optimum gating and riser system for ferrous and non-ferrous materials. Melting and casting, inspection for macroscopic casting defects.

- Welding: TIG and MIG welding processes design weld joints welding practice –weld quality inspection.
- Metal Forming: Press working operation hydraulic and mechanical press -load calculation: blanking, bending and drawing operations sheet metal layout design.

Semester:	3 Cou	rse Type: IPC	C										
Course Title: MATERIAL SCIENCE AND METALLURGY													
Course Code	23	BMEI304		Credits:	04								
Teaching H	lours/Weel	k (L:T:P:O)	2:2:2:0	Total Hours:	40 hours +ab slots								
CIE Marks:	50	SEE Marks:	50	Total Marks:	100								
SEE Type:	Theory			Exam Hours:	03								

I. Course Objectives:

- To provide knowledge of geometrical crystallography, crystal structure and imperfections in Solids.
- To know the phase transformations and concept of diffusion in solids.
- To gain the knowledge the heat treatment, cooling method for controlling the microstructure and plastic deformation to modify their properties.
- To impart knowledge of the powder metallurgy process, types and surface modifications
- To provide trends in material technology with focus on composites materials.
- To inculcate knowledge on mechanical behaviour of engineering materials
- To equip students with the skills to determine the mechanical properties of engineering materials

II. Teaching-Learning Process (General Instructions):

- •Adopt different types of teaching methods to develop the outcomes through Power Point presentations and Video demonstrations or Simulations.
- •Chalk and Talk method for Problem Solving.
- •Adopt flipped classroom teaching method.
- •Adopt collaborative (Group Learning) learning in the class.

III. COURSE CONTENT

III(a). Theory PART

Module-1 Crystal Structure & Mechanical Behaviour

8 Hrs

Introduction to Crystal Structure: Coordination number, atomic packing factor, Simple Cubic, BCC,FCC and HCP Structures, Crystal imperfections—point, line, surface and volume imperfections. Atomic Diffusion: Phenomen on Fick's laws of diffusion (First and Second Law); Factors affecting diffusion.

Mechanical Behaviour: Stress-strain diagrams showing ductile and brittle behaviour of materials, Engineering stress and true strains, Linear and non-linear elastic behaviour and properties, Mechanical properties in plastic range: Stiffness, Yield strength, Offset Yield strength, Ductility, Ultimate Tensile strength, Toughness. Plastic deformation of single crystal by slip and twinning, Mechanisms of strengthening in metals.

Textbook2: Chapter 3,6,8,11: sections 3.1,3.2,3.3,6.1,6.2,6.3,6.4,8.1.8.2,11.1,11.2,11.3

Pre-requisites (**Self Learning**) Concepts of unit cell, space lattice, Unit cells for cubic crystals (Simple cubic, BCC & FCC) and HCP structure and calculations of radius.

RBT Levels: L1, L2, L3

Module-2: Physical Metallurgy, Diffusion & Phase Diagrams

8 Hrs

Heading:

Physical Metallurgy

Alloy Systems: Classification of Solid solutions, Hume- Rothery Rules, Gibbs Phase Rule

Phase Diagrams:, Solubility limit, phase equilibrium and Phase Diagrams: Isomorphous systems, Invariant Binary Reactions: Eutectic reaction, Eutectoid reaction and Peritectic reaction, Lever Rule, Iron-Carbon Diagram. Effect of common alloying elements in steel. Numerical on Lever rule.(**No Problems on Phase Daigrams**)

Textbook 2:Chapter: 7, 9 sections; 7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 9.1, 9.2

Pre-requisites (Self Learning)

Phase Diagrams for different reaction and observing micro structure.

RBT Levels: L1,L2.L3

Module-3: Nucleation & growth and Heat treatment

8 Hrs

Nucleation and growth: Introduction to homogeneous and heterogeneous nucleation, critical radius for nucleation.

Heat treatment: Annealing, Normalizing, hardening, Tempering, Nitriding, Cyaniding, Induction Hardening and Flame Hardening, Recent advances in heat treat technology. TTT diagram, Recovery-Recrystallization-Grain Growth. Strengthening mechanisms: Strain hardening, Precipitation hardening (Solid-Solution Strengthening), Grain refinement.

Textbook 2: Chapter: 9 sections 9.1 to 9.8

Pre-requisites (Self Learning)

Nucleation and growth in different materials and Heat treatment process on other materials.

RBT Levels:L1,L2,L3

Module-4: Surface coating & Powder metallurgy

8 Hrs

Surface coating technologies: Introduction, coating materials, coating technologies, types of coating: Electro-plating, Chemical Vapor Deposition(CVD)- Hot-wall thermal CVD, & Plasma assisted CVD, Physical Vapor Deposition(PVD)- evaporation and sputtering, High Velocity Oxy-Fuel Coating, advantages and disadvantages of surface coating.

Powder metallurgy: Introduction, Powder Production Techniques: Different Mechanical methods: Chopping or Cutting, Abrasion methods, Machining methods, Ball Milling and Chemical method: Chemical reduction method. Characterization of powders (Particle Size & Shape Distribution), Powder Shaping: Particle Packing Modifications, Lubricants & Binders, Powder Compaction & Process, Sintering and Application of Powder Metallurgy.

Reference book 5: Chapters 14 Page No; 552-582, Chapters 17 Page No; 656-677

Pre-requisites (Self Learning)

Application and process of Surface coating technologies and Different types of Powder metallurgy techniques.

RBT Levels:L1,L2

Module-5: Engineering Materials

8 Hrs

Engineering Materials and Their Properties: Classification, Ferrous materials: Properties, Compositions and uses of Grey cast iron and steel. Non-Ferrous materials: Properties, Compositions and uses of Copper, Brass, Bronze.

Composite Materials: Definition, classification. Properties and applications of FRPs, MMCs and Ceramic composites. Production methods of FRPs (Pultrusion, filament winding, hand lay-up, vacuum bag processes and spray forming processes) and MMCs (stir casting, squeeze casting).

Textbook1: Chapter: 11,16 sections; 11.1,11.2,11.3,16.1 to 16.13

Pre-requisites (Self Learning):

Identify Ferrous materials and Non ferrous materials: Properties, Compositions and their uses.

Identify	Fer	rous n	nateria	ls and	Non fer	rous 1	nateria	ıls : Pro	opertie	s, Con	positio	ons and	l their	uses.		
RBT L	eve	ls: L1	l, L2

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Course seminar Industrial tour/Visit to Advanced Research Centres

Semester:	3	Course Type:		PCCL							
Course Title:	Course Title: MECHANICAL MEASUREMENTS AND METROLOGY LAB										
Course Cod	le:	23MEL305		Credits: 1							
Teaching	Hours/	Week (L:T:P:C))	0:0:2:0	Total Hours:	Lab slots					
CIE Mark	s: 50	O SEE Ma	rks:	50	Total Marks:	100					
SEE Type	e:	Pr	actica	al Exam Hours: 3							
CIE Mark	s: 50	O SEE Ma	rks:	50	Total Marks:						

I. Course Objectives:

- 1.To illustrate the theoretical concepts taught in Mechanical Measurements & Metrology through experiments.
- 2.To illustrate the use of various measuring tools measuring techniques.
- 3.To understand calibration techniques of various measuring devices.

II. Teaching-Learning Process (General Instructions):

Mention the planned/proposed sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

	III. PRACTICAL PART								
Sl. No.	Experiments								
	MECHANICAL MEASUREMENTS								
1	Calibration of Pressure Gauge								
2	Calibration of Thermocouple								
3	Calibration of LVDT								
4	Calibration of Load cell								
5	Determination of modulus of elasticity of a mild steel specimen using strain gauges								
	METROLOGY								
6	Measurements using Optical Projector / Toolmaker Microscope								
7	Measurement of angle using Sine Center / Sine bar / bevel protractor								
8	Measurement of alignment using Autocollimator / Roller set								
9	Measurements of Surface roughness, Using Tally Surf/Mechanical Comparator								
10	Measurement of gear tooth profile using gear tooth Vernier /Gear tooth micrometer								
11	Measurements of Screw thread Parameters using two wire or Three-wire methods.								
12	Measurement using optical flat								
13	Measurement using slip gauges								
Demons	stration Experiments								
14	Measurement of cutting tool forces using a)Lathe tool Dynamometer OR b) Drill tool Dynamometer.								

Instru	Instructions for conduction of practical part:															
	III. COURSE OUTCOMES

Semester:	III	Course Type:	ETC								
Course Title: OBJECT ORIENTED PROGRAMMING WITH JAVA											
Course Cod	Course Code: 23MEE311 Credits: 03										
Teaching Hou	ırs/We	ek (L:T:P:O)		2:0:2:0	Total Hours:	25 hours + Lab slots					
CIE Marks	: 50	SEE Ma	rks:	50	Total Marks:	100					
SEE Type	:	T	heory	,	Exam Hours:	03					

I. Course Objectives:

- To learn primitive constructs JAVA programming language.
- To understand Object Oriented Programming Features of JAVA.
- To gain knowledge on: packages, multithreaded programing and exceptions

II. Teaching-Learning Process (General Instructions):

Teaching-Learning Process (General Instructions)

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes and make Teaching —Learning more effective

- 1. Use Online Java Compiler IDE: https://www.jdoodle.com/online-java-compiler/ or any other.
- 2. Demonstration of programing examples.
- 3. Chalk and board, power point presentations
- **4.** Online material (Tutorials) and video lectures

III. COURSE CONTENT III(a). Theory PART

Module-1: 5Hrs

An Overview of Java: Object-Oriented Programming (Two Paradigms, Abstraction, The Three OOP Principles), Using Blocks of Code, Lexical Issues (Whitespace, Identifiers, Literals, Comments, Separators, The Java Keywords).

Data Types, Variables, and Arrays: The Primitive Types (Integers, Floating-Point Types, Characters, Booleans), Variables, Type Conversion and Casting, Automatic Type Promotion in Expressions, Arrays, Introducing Type Inference with Local Variables.

Operators: Arithmetic Operators, Relational Operators, Boolean Logical Operators, The Assignment Operator, The ? Operator, Operator Precedence, Using Parentheses.

Control Statements: Java's Selection Statements (if, The Traditional switch), Iteration Statements (while, do-while, for, The For-Each Version of the for Loop, Local Variable Type Inference in a for Loop, Nested Loops), Jump Statements (Using break, Using continue, return).

Textbook 1: Chapter: 2, 3, 4, 5

Module-2:	5Hrs
-----------	------

Introducing Classes: Class Fundamentals, Declaring Objects, Assigning Object Reference Variables, Introducing Methods, Constructors, The this Keyword, Garbage Collection.

Methods and Classes: Overloading Methods, Objects as Parameters, Argument Passing, Returning Objects, Recursion, Access Control, Understanding static, Introducing final, Introducing Nested and Inner Classes.

Textbook 1: Chapter 6, 7

RBT Levels: L1,L2

Module-3: 5Hrs

Inheritance: Inheritance Basics, Using super, Creating a Multilevel Hierarchy, When Constructors Are Executed, Method Overriding, Dynamic Method Dispatch, Using Abstract Classes, Using final with Inheritance, Local Variable Type Inference and Inheritance, The Object Class.

Interfaces: Interfaces, Default Interface Methods, Use static Methods in an Interface, Private Interface Methods.

Textbook 1: Chapter 8, 9

RBT Levels: L1,L2,L3

Module-4: 5 Hrs

Packages: Packages, Packages and Member Access, Importing Packages.

Exceptions: Exception-Handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Java's Built-in Exceptions, Creating Your Own Exception Subclasses, Chained Exceptions.

Textbook 1: Chapter 9, 10

RBT Levels: L1,L2

Module-5: 5Hrs

Multithreaded Programming: The Java Thread Model, The Main Thread, Creating a Thread, Creating Multiple Threads, Using isAlive() and join(), Thread Priorities, Synchronization, Interthread Communication, Suspending, Resuming, and Stopping Threads, Obtaining a Thread's State.

Enumerations, Type Wrappers and Autoboxing: Enumerations (Enumeration Fundamentals, The values() and valueOf() Methods), Type Wrappers (Character, Boolean, The Numeric Type Wrappers), Autoboxing (Autoboxing and Methods, Autoboxing/Unboxing Occurs in Expressions, Autoboxing/Unboxing Boolean and Character Values).

Textbook 1: Chapter 11, 12

RBT Levels: L1,L2

III(b). PRACTICAL PART

	(*)*									
Sl. No.	Programs									
1	Develop a JAVA program to add TWO matrices of suitable order N (The value of N should be read from command line arguments.									
2	Develop a stack class to hold a maximum of 10 integers with suitable methods. Develop a JAVA main method to illustrate Stack operations									
3	A class called Employee, which models an employee with an ID, name and salary, is designed as shown in the following class diagram. The method raiseSalary (percent) increases the salary by the given percentage. Develop the Employee class and suitable main method for demonstration									

	A class called MyPoint, which models a 2D point with x and y coordinates, is designed as follows:							
	Two instance variables x (int) and y (int).							
	• A default (or "no-arg") constructor that construct a point at the default location of (0,							
	 0). A overloaded constructor that constructs a point with the given x and y coordinates. A method setXY() to set both x and y. 							
	A method getXY() which returns the x and y in a 2-element int array.							
4	• A toString() method that returns a string description of the instance in the format "(x, y)".							
	• A method called distance(int x, int y) that returns the distance from this point to another point at the given (x, y) coordinates							
	 An overloaded distance(MyPoint another) that returns the distance from this point to the givenMyPoint instance (called another) 							
	Another overloaded distance() method that returns the distance from this point to the							
	origin (0,0) Develop the code for the class MyPoint. Also develop a JAVA program							
	(called TestMyPoint) to test all the methods defined in the class.							
	Develop a JAVA program to create a class named shape. Create three sub classes namely:							
5	circle, triangle and square, each class has two member functions named draw () and							
S	erase (). Demonstrate polymorphism concepts by developing suitable methods, defining							
	member data and main program							
	Develop a JAVA program to create an abstract class Shape with abstract methods							
6	calculateArea() and calculatePerimeter(). Create subclasses Circle and Triangle that extend the Shape class and implement the respective methods to calculate the area and perimeter of each							
	shape.							
	Develop a JAVA program to create an interface Resizable with methods resizeWidth(int width)							
7	and resizeHeight(int height) that allow an object to be resized. Create a class Rectangle that							
	implements the Resizable interface and implements the resize methods							
8	Develop a JAVA program to create a package named mypack and import & implement it in a suitable class							
	Write a program to illustrate creation of threads using runnable class. (start method start each							
9	of the newly created thread. Inside the run method there is sleep() for suspend the thread for 500 milliseconds)							
	Develop a program to create a class MyThread in this class a constructor, call the base class							
10	constructor, using super and start the thread. The run method of the class starts after this. It can							
	be observed that both main thread and created child thread are executed concurrently							
	IV. COURSE OUTCOMES							
CO1	Demonstrate proficiency in writing simple programs involving branching and looping							
COI	structures.							
CO2	Design a class involving data members and methods for the given scenario.							
CO3	Apply the concepts of inheritance and interfaces in solving real world problems.							
CO4	Use the concept of packages and exception handling in solving complex problem							
CO5	Apply concepts of multithreading, autoboxing and enumerations in program development							

	V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)															
PO/PS O	1	2	3	4	5	6	7	8	9	10	11	12	S1	S2	S 3	S4

3.	Thinking in Java	Bruce Eckel.	4 TH Edition, 2006 (https://sd.blackball.lv/ library/thinking_in_jav a_4th_edition.pdf)	Prentice Hall,

VII(c): Web links and Video Lectures (e-Resources):

- Java Tutorial: https://www.geeksforgeeks.org/java/
- Introduction To Programming In Java (by Evan Jones, Adam Marcus and Eugene Wu): https://ocw.mit.edu/courses/6-092-introduction-to-programming-in-java-january-iap-2010/
- Java Tutorial: https://www.w3schools.com/java/

Java Tutorial: https://www.javatpoint.com/java-tutorial

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Activity Based Learning (Suggested Activities)/ Practical Based learning

- 1. Installation of Java (Refer: https://www.java.com/en/download/help/index_installing.html)
- 2. Demonstration of online IDEs like geeksforgeeks, idoodle or any other Tools
- 3. Demonstration of class diagrams for the class abstraction, type visibility, composition and inheritance

Assessment Method

Programming Assignment / Course Project

Semester:	III	Cour	rse Type:	ETC						
Course Title: PRINCIPLES OF ROBOTICS										
Course Code	2	23MEE31	.2		Credits:		3			
Teaching Ho	Teaching Hours/Week (L:T:P:O)					Total Hours:	25 hrs Theory + Lab slots			
CIE Marks:		50	SEE Mai	rks:	50	Total Marks:	100			
SEE Type: Theory						Exam Hours:	3 Hours			

I. Course Objectives:

This course will enable students:

- 1. To introduce various types of Robots and the functional elements of Robotics
- 2. To impart knowledge of robot actuator and drive systems
- 3. To educate on various sensors used in Robotic automation and end effectors
- 4. To apply knowledge of the basics of Robot Programming and robotic Applications

II. Teaching-Learning Process (General Instructions):

- Power point presentations and Video demonstrations.
- Adopt collaborative (Group Learning) Learning in the class.
- Adopt Activity Based Learning (ABL), which foster students' Analytical skills and develops thinking skills.

III. COURSE CONTENT

III(a). Theory PART

Module-1: Fundamentals of Robotics

5 Hrs

Historical development of Robotics, Definitions of Industrial robots, Type and Classification of Robots, Asimov's laws of robotics, Robot configurations, Robot Components, Robot Degrees of Freedom, Work volume and work envelope, Robot Joints and symbols, Robot Coordinates, Robot Reference Frames, Resolution, accuracy and precision of Robot, Work cell control,

Textbook:1 Chapter:1 sections:1.1 to 1.17 Textbook:2 Chapter:1 sections:1.1 to 1.4

Pre-requisites (Self Learning): Elements of Mechanical engineering

RBT Levels: L1, L2,L3

Module-2: Robot actuators and Drive Systems

5 Hrs

Pneumatic Drives, Hydraulic Drives, Mechanical Drives, Electrical Drives-D.C. Servo Motors, Stepper Motors, A.C. Servo Motors, BLDC-Salient Features, Applications and Comparison of all these Drives, Micro actuators, selection of drive, Power transmission systems for robot, Motion conversion.

Textbook:1 Chapter:7 sections:7.1 to 7.13

Pre-requisites (Self Learning): Basic Electrical engineering

RBT Levels: L1, L2,L3

Module-3: End Effectors

5 Hrs

End Effectors

Grippers, Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; advanced grippers- Adaptive grippers, Soft Robotics Grippers.

End Effectors - Textbook: 2 Chapter: 4 sections: 5.1 to 5.6

Pre-requisites (Self Learning): Elements of Mechanical engineering

RBT Levels: L1, L2,L3

Module-4: Robot Sensors

5 Hrs

Principles and applications of the following types of sensors- Proximity Sensors, Photo Electric Sensors, Position sensors – Piezo Electric Sensor, LVDT, Resolvers, Encoders – Absolute and Incremental: - Optical, Magnetic, Capacitive, pneumatic Position Sensors, Range Sensors- Range Finders, Laser Range Meters, Touch Sensors, Force and torque sensors.

Textbook:1 Chapter:8 sections:8.1 to 8.20 Textbook:2 Chapter:6 sections:6.1 to 6.6

Pre-requisites (Self Learning): Basic Electrical and Electronics Technology

RBT Levels: L1, L2,L3

Module-5: Fundamentals of Robot Programming and Languages

5 Hrs

Methods of robot programing, leadthrough programing methods, motion interpretation, wait, signal and delay commands, branching, capabilities and limitations of leadthrough method. The textual robot languages, generation of robot programing languages, robot language structure, constants variables and other data objects, motion commands, computations and operations, program control and subroutines, communication and data processing, monitor mode commands.

Robot Programming - Textbook:2 Chapter:8 sections:8.1 to 8.7 Robot Languages - Textbook:2 Chapter:9 sections:9.1 to 9.10

Pre-requisites (Self Learning): basics about programing language.

III(b). PRACTICAL PART

Sl. No.	Experiments / Programs / Problems (insert rows as many required)
1	Identify and selection of Sensors of IR sensors, Proximity Sensor based on given application.
2	Identify and selection of Sensors of Ultrasonic and capacitive Sensor based on given application.
3	Identify and selection of Actuators and related hardware such as DC motor, Servo motor, Stepper Motor, Motor drivers based on application
4	Demonstration of various robotic configurations using industrial robot
5	Design and selection of Gripper / End effector.

RBT L	RBT Levels: L1, L2,L3							
10	Choose the right robot for given manufacturing and non- manufacturing applications							
9	Demonstration of simple robotic system using Matlab/ MscAdam / RoboAnalyser software							
8	One Industrial visit for Industrial robotic application							
7	Electro Pneumatic actuation system design.							
6	Electro Hydraulic actuation system design.							

IV. COURSE OUTCOMES

CO1	APPLY the basic concepts of robots and its configuration.
CO2	ANALYSE appropriate drives and sensors for Robotic applications
CO3	RECOGNISE applications of robot end effectors for robot applications.
CO4	EXECUTE fundamentals of robot programming and languages.

V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)

PO/PSO	1	2	3	4	5	6	7	8	9	10	11	12	S 1	S2	S 3	S4
CO1	3				2								3			
CO2	3	2			2								3	2		
CO3	3	2			2								3	2		
CO4	3	2			2								3	2		

VI. Assessment Details (CIE & SEE)

General Rules: Refer Annexure section – 1

Continuous Internal Evaluation (CIE): Refer Annexure section – 1

Semester End Examination (SEE): Refer Annexure section – 1

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Conduction of Quiz, assignments & case studies

Semester:	3rd	Cou	arse Type:		ETC						
Course Title:	Course Title: MICRO ELECTROMECHANICAL SYSTEMS (MEMS)										
Course Cod	Course Code: 23MEE313 Credits: 03										
Teac	Teaching Hours/Week (L:T:P:O)					Total Hours:	40				
CIE Marks	5: 5	0	SEE Ma	rks:	50	Total Marks:	100				
SEE Type	:		T	heory	7	Exam Hours:					

I. Course Objectives:

- 1. Understand the fundamental principles and working mechanisms of Micro Electromechanical Systems (MEMS) technology.
- 2. Gain knowledge of various MEMS fabrication techniques and processes used in industry.
- 3. Develop skills in designing MEMS devices, considering factors such as mechanical, electrical, and thermal properties.
- 4. Learn about the different types of MEMS sensors and actuators, their operating principles, and applications.
- 5. Explore MEMS packaging and integration techniques to ensure reliability and functionality of MEMS devices.

II. Teaching-Learning Process (General Instructions):

Chalk and talks ppt videos

Interactive discussions, brainstorming sessions, and peer-to-peer learning activities will be encouraged during lectures.

Continuous Assessment and Feedback:

Assessment will be conducted through a combination of quizzes, assignments

III. COURSE CONTENT

III(a). Theory PART

Module-1: Introduction to MEMS

08 Hrs

Heading: Introduction to MEMS technology Historical perspective and evolution

MEMS applications Multidisciplinary Nature of Microsystems, Miniaturization. Applications and Markets trends EMS fabrication processes

MEMS and Microsystems: Design, Manufacture, and Nanoscale Engineering" by Tai-Ran Hsu

Chapter 1: Introduction to MEMS (Page 1-15)

Chapter 2: Basic MEMS Fabrication Techniques (Page 17-47)

- Prerequisites: None
- Description: This module serves as an introduction to MEMS technology and does not have any specific prerequisites. It provides foundational knowledge about MEMS, including historical context, basic fabrication techniques, and applications.

RBT Levels:L1

Module-2: **MEMS Design and Modeling**

08 Hrs

Working Principles of Microsystems: Introduction, Micro sensors, Micro actuation, MEMS with Micro actuators, Micro accelerometers, Microfluidics.

MEMS design considerations and constraints Mechanical modeling of MEMS structures

- Electrical modeling of MEMS devices Finite Element Analysis (FEA) for MEMS design

Textbook: "MEMS Mechanical Sensors" by Steve P. Beeby and Graham M. Brodie

- Chapter 2: MEMS Design Principles (Page 33-65)
- Chapter 3: Mechanical Modeling of MEMS Structures (Page 67-104)

Prerequisites: Basic understanding of engineering mechanics and solid mechanics concepts.

- Description: This module focuses on the design and modeling aspects of MEMS devices. Students should have a grasp of engineering mechanics principles to understand mechanical modeling techniques for MEMS structures

RBT Levels:L1

Module-3: MEMS Sensors and Actuators

08 Hrs

Principles of sensing and transduction mechanisms

- Types of MEMS sensors (accelerometers, gyroscopes, pressure sensors, etc.)
- MEMS actuators (electrostatic, piezoelectric, thermal, etc.)
- Interface electronics for MEMS devices

**Textbook: "MEMS for Automotive and Aerospace Applications" by Michael Kraft and Neil M. White

- Chapter 3: MEMS Sensors and Transduction Principles (Page 43-76)
- Chapter 4: MEMS Actuators (Page 77-106)

Prerequisites: Basic knowledge of electronics and transduction principles.

- Description: This module covers the principles of sensing and actuation mechanisms in MEMS devices. Students should have a basic understanding of electronics concepts to comprehend the operation of MEMS sensors and actuators.

RBT Levels:L1,L2

Module-4: MEMS Packaging and Integration

08 Hrs

- Packaging challenges and solutions for MEMS devices
- Wafer-level packaging techniques
- Integration of MEMS with electronics and microfluidics
- Reliability and testing of MEMS devices

Textbook: "MEMS Packaging" by Rory A. Raftery and John H. Lau

- Chapter 2: MEMS Packaging Fundamentals (Page 27-58)
- Chapter 3: Wafer-Level Packaging Techniques (Page 59-92)

Prerequisites: Familiarity with semiconductor packaging concepts and materials science fundamentals.

- Description: This module addresses the packaging and integration challenges in MEMS technology. Students should be familiar with semiconductor packaging principles and have a basic understanding of materials science to grasp the concepts covered in this module

RBT Levels:L2

Module-5: Emerging Trends in MEMS

08 Hrs

Advanced MEMS materials and fabrication techniques

- MEMS for biomedical and healthcare applications
- MEMS in Internet of Things (IoT) and wearable devices
- Future directions and challenges in MEMS technology

Textbook: "Emerging Trends and Applications of MEMS" edited by Sundararajan V. Madihally and Donald Leo

- Chapter 1: Advanced MEMS Materials and Fabrication (Page 1-28)

- Chapter 5: MEMS for Biomedical Applications (Page 89-116)

Prerequisites: Completion of Modules 1-4 or equivalent background knowledge.

- Description: This module explores advanced topics and emerging trends in MEMS technology. Students should have a solid understanding of the fundamental principles covered in previous modules to engage with the advanced concepts presented in this module.

RBT Levels:L3

	IV. COURSE OUTCOMES															
CO1		Analyze the material properties and selection criteria used in MEMS manufacturing														
CO2		Evaluate the integration of MEMS components with electronic circuits for signal processing and control.														
CO3		Explore the application of MEMS technology in various fields such as biomedical devices, automotive systems, telecommunications, and consumer electronics.														
CO4		Apply principles of mechanics, electronics, and thermodynamics to the design and analysis of MEMS devices														
CO5		Solve complex engineering problems using MEMS technology by developing innovative solutions and prototypes.														
				V. C	O-PO	-PSO	MAPI	PING	(mark	H=3;	M=2;	L=1)

Semester:	3	Course Type:		ETC							
Course Title:	Course Title: INDUSTRIAL DESIGN AND ERGONOMICS										
Course Code: 23MEE314 Credits: 3											
Teach	ing Ho	urs/Week (L:T	:P:O)	3:0:0:0	Total Hours:	40					
CIE Mark	s: 5	SEE M	arks:	50	50 Total Marks:						
SEE Type	e:	,	Γheory		Exam Hours:	3					

I. Course Objectives:

- To increase awareness of the need for and role of ergonomics in occupational health.
- To obtain knowledge in the application of ergonomic principles to design of industrial workplaces.
- To prevention of occupational injuries.
- To understand the breadth and scope of occupational ergonomics.

II. Teaching-Learning Process (General Instructions):

- Chalk and talk method
- PowerPoint Presentation
- Videos

III. COURSE CONTENT

III (a). Theory PART

Module-1: Introduction

08 Hrs

The focus of ergonomics, Ergonomics, and its areas of application in the work system, A brief history of ergonomics, attempts to 'humanise 'work, Modern ergonomics, Effectiveness and cost effectiveness, Future directions for ergonomics.

Textbook: 2 Chapter: 1

Pre-requisites (Self Learning): NA

RBT Levels: L1, L2

Module-2: Displays, controls and virtual environments

08 Hrs

Principles for the design of visual displays, Auditory displays, Design of controls, Combining displays and controls, Virtual ('synthetic') environments, Effectiveness, and cost-effectiveness.

Textbook: 2 Chapter: 13

Pre-requisites (Self Learning): NA

RBT Levels: L1, L2

Module-3: Vision, light, and lighting

08 Hrs

Vision and the eye, Measurement of light, Lighting design considerations, Visual fatigue, eyestrain and near work, Psychological aspects of indoor lighting, Effectiveness and cost - effectiveness.

Textbook: 2 Chapter: 10

Pre-requisites (Self Learning): NA										
RBT Levels: L1, L2										
Module-4: Static work: Design for standing and seated workers 08 Hrs										
Fundamental aspects of standing and sitting, An ergonomic approach to workstation design, Design for standing workers, Design for seated workers, Work surface design, Visual display units, Guidelines for the design of static work, Effectiveness and cost-effectiveness. Textbook: 2 Chapter: 4										
Pre-requisites (Self Learning): NA										
RBT Levels: L1, L2										
Module-5: Industrial Design in Practice 08 Hrs										
General design -specifying design equipment's- rating the importance of industrial design - industrial design in the design process Textbook: 1 Chapter: 2										
Pre-requisites (Self Learning): NA										
RBT Levels: L1, L2										
IV. COURSE OUTCOMES										
CO1 Outline the concepts of Industrial design and man-machine relationship.										
CO2 Choose the optimistic display and control devices for various applications.										
CO3 Apply the anthropomorphic data in ergonomic design										
CO4 Identify the visual effects of lines, form and color on engineering equipment										
CO5 Select appropriate aesthetic aspects for design of industrial machinery and devices										
V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)										
PO/PS 1 2 3 4 5 6 7 8 9 10 11 12 S1 S2 S3 S4										
CO1 3 2 1 1										
CO2 3 2 1 1										
CO3 3 2 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1										
CO4 3 2 1 1 1										
VI. Assessment Details (CIE & SEE) General Rules: Refer Annexure section – 1										
Continuous Internal Evaluation (CIE): Refer Annexure section – 1										
Semester End Examination (SEE): Refer Annexure section -1										
VII. Learning Resources

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

- Quizzes
- Assignments
- Seminars

Semester:	III Course	e Type:		AEC						
Course Title:	Course Title: CATIA									
Course Code		23MEAE	31	Credits:	01					
Teachin	g Hours/Wee	k (L:T:P:O)	1:0:0:3	Total Hours:	40					
CIE Marks:	50	SEE Marks:	50	Total Marks:	100					
SEE Type:		Theory		Exam Hours:	02					

IV. Course Objectives:

- 1) Gain proficiency in understanding and navigating the CATIA interface
- 2) Usage of various tools, techniques and features in CATIA for designing and modelling.
- 3) Develop the ability to create complex 3D Models.
- 4) Understanding usage of CATIA for Solid and Surface modelling
- 5) Acquire skills in creating detailed 2D drawings from 3D models.

V. Teaching-Learning Process (General Instructions):

Mention the planned/proposed sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

Chalk & Talk Method

Power Point Presentation

Keynotes

Hands-on Practice

Problem-solving Exercises

Presentations

Assignment

VI. COURSE CONTENT

III(a). Theory PART

Module-1: Introduction to CATIA

4 Hrs

Introduction to CATIA, CATIA Workbenches, System Requirements, Getting Started with CATIA (User Interface), Understanding the Functions of the Mouse Buttons, Toolbars, Colour Scheme, Specification tree, Compass, Zoom, Viewports, Hiding and Showing Geometric Elements, Swapping Visible space, Units and Grid settings

RBT Levels: L1,L2, L3

Module-2: Drawing and Modifying Sketches in Sketcher WorkBench

8 Hrs

Drawing Sketches Using Sketcher Tools

Drawing Lines, Rectangles, Oriented Rectangles, Parallelograms Circles, Arcs, Profiles, Creating Points Ellipses, Splines, Connecting Two Elements by a Spline or an Arc, Elongated Holes, Cylindrical Elongated Holes, Keyhole Profiles, Hexagons, Centred Rectangles, centred Parallelograms, Conics

Modifying Sketches

Trimming Unwanted Sketched Elements, Extending Sketched Elements, Trimming by Using the Quick Trim Tool, Filleting Sketched Elements, Chamfering Sketched Elements, Mirroring Sketched Elements

Mirroring Elements without Duplication, Translating Sketched Elements, Rotating Sketched Elements

Scaling Sketched Elements, Offsetting Sketched Elements, Modifying Sketched Elements Deleting Sketched Element,

RBT Levels: L2,L3

Module-3: Constraining Sketches and Creating Sketch-Based Features

10 Hrs

Constraining Sketches

Concept of Constrained Sketches

Iso-Constraint, Under-Constraint, Over-Constrained, Inconsistent.

Applying Geometrical Constraints, Dimensional Constraints, Contact Constraints, Fix Together Constraints, Auto Constraints.

Analyzing and Deleting Over-Defined Constraints using the Sketch Analysis Tool **Exiting the Sketcher Workbench**

Creating Base Features by pad

Creating a Thin Extruded Feature

Extruding Sketch Using the Profile Definition Dialog Box along a Directional Reference Creating Drafted Filleted Pad Features, Multi-Pad Features, Pocket Features, Drafted Filleted Pocket Features, Multi-Pocket Features, Groove Features, Extruding and Revolving Planar and Non-planar Faces.

Other Modelling Tools -Hole Features, Fillets, Chamfers, Adding a Draft to the Faces of the Model

RBT Levels: L2,L3,L6

Module-4: Editing Features, Advanced Modelling Tools and Transformation Features

10 Hrs

Editing Features : Editing Using the Definition Option, Editing by Double-Clicking, Editing the Sketch of a Sketch-Based Feature, Redefining the Sketch Plane of Sketches, Deleting Unwanted Features, Managing Features and Sketches by using the Cut, Copy, And Paste Functionalities. **Advance Modelling Tools:** Creating Rib Features, Creating Slot Features, Creating Multi-

Advance Modelling Tools: Creating Rib Features, Creating Slot Features, Creating Multi-Sections Solid Features.

Transformation Features: Translating Bodies, Rotating Bodies, Creating Symmetry Features, Transforming the Axis System, Mirroring Features and Bodies, Creating Rectangular Patterns, Creating Circular Patterns, Creating User Patterns, Uniform Scaling of Model, Non-uniform Scaling of Model.

RBT Levels: L2,L3,L6

Module-5: Working with Surface Design Workbench, Editing and Modifying Surfaces

Hrs

Need of Surface Modeling

Starting the Wireframe and Surface Design Workbench

Creating Wireframe Elements

Creating Circles, Creating Splines, Creating a Helix, Creating Surfaces

Extruded Surfaces, Revolved Surfaces, Spherical Surfaces, Cylindrical Surfaces, Offset Surfaces, Sweep Surfaces, Fill Surfaces, Multi-Sections Surfaces, Blended Surfaces

Operations on Shape Geometry

Joining Surfaces, Splitting Surfaces, Trimming Surfaces

Surface Operations

Creating Projection Curves, creating Intersection Elements, Healing Geometries, Disassembling Elements, Untrimming a Surface or a Curve, Creating Boundary Curves, Extracting Geometry, Transformation Features, Extrapolating Surfaces and Curves, Splitting a Solid Body with a Surface

Solidifying Surface Models

CATIA V5 Reference

Adding Thickness to a Surface, creating a Solid Body from a Closed Surface Body, Sewing a Surface to a Solid Body

Surrace to		Iu Do	uy

Semester: II	I Cour	rse Type:	NCMC					
Course Title: S	KILL FUL	L FUTURES:	EMPOWERING A	PTITUDE AND	SOFT SKILLS			
Course Code:	231	PDSN03	Credits: PP/NP					
Teachin	g Hours/W	eek (L:T:P:O)	0:0:0:2	Total Hours:	24			
CIE Marks:	50	SEE Marks:		Total Marks:	50			
SEE Type:		NA	Exam Hours: 00					

Course Objectives:

- > Strengthen logical and analytical thinking skills required to solve quantitative problems.
- > Discuss the importance of ethical considerations in leadership and negotiation, emphasizing integrity, fairness, and accountability in decision-making and interactions.
- Apply problem-solving strategies to real-world situations.
- Crafting Effective Openings and Closings.
- > Develop a systematic approach to creative problem solving

II. Teaching-Learning Process (General Instructions):

Mention	the planned/proposed sample Strategies, which teachers can use to accelera	te the
attainme	nt of the various course outcomes.	
	III. COURSE CONTENT	
	III(a). Theory PART	
Module	-1: (Quantitative Aptitude-1)	06 Hrs
Problem	s on Permutation and Combination. Problems on Surds and Indices	
Pre-req	uisites (Self Learning)	
Module	-2: (Leadership and Negotiation skills)	04 Hrs
Leader s	kills, Persuasion Skills, Negotiation Skills and Conflict Resolving Skills	
	uisites (Self Learning)	
Module	e-3: (Quantative aptitude - 02)	06 Hrs
	s on Percentage, Problems on Profit	
	s, Problems on cubes and Dices	
	uisites (Self Learning)	1
	2-4: (Letter and Writing Skills)	04 Hrs

MECHANICAL ENGINEERING

4th Semester Syllabus

Semester:	04 Co	urse Type: BSC					
Course Title: P	ROBABI	LITY DISTRIB	UTIONS & COMP	LEX VARIABLE	S.		
Course Code	2	3MET401	Credits: 3				
Teaching	Hours/W	eek (L: T: P: O)	2:2:0:@	Total Hours:	40		
CIE Marks:	50	SEE Marks:	50	Total Marks:	100		
SEE Type:	Theory			Exam Hours:	3		

I. Course Objectives:

- Apply the knowledge of theory of probability in the study of uncertainties
- Understand the concepts of sampling distributions.
- Use probability and sampling theory to solve random physical phenomena and implement appropriate distribution models
- Understand theory of complex Integral.

II. Teaching-Learning Process (General Instructions):

- 1. In addition to the traditional lecture method, innovative teaching methods shall be adopted.
- 2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
- 3. Grading assignments and quizzes and documenting students' progress.
- 4. Encourage the students for group learning to improve their creative and analytical skills.

III. COURSE CONTENT

Module-1 Probability Distributions

Hrs: 8

Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Binomial, Poisson, and normal distributions- Illustrative examples.

Textbook 1: Chapter:26-[Section 26.7 to 26.10, 26.14 to 26.16]

Self Learning: Exponential distribution

RBT Levels:L1, L2 and L3

Module-2 Joint probability distribution & Markov Chain

Hrs: 8

Joint probability distribution: Joint Probability distribution for two discrete random variables, expectation, covariance and correlation.

Markov Chain: Introduction to Stochastic Process, Probability Vectors, Stochastic matrices, Regular stochastic matrices, Markov chains, Higher transition probabilities, Stationary distribution of Regular Markov chains and absorbing states.

Textbook 3:Chapter:31-[sections:31.1 & 31.2]

Self Learning: Point estimation & Interval estimation.

RBT Levels:L1, L2 and L3

Module-3: Hypothesis and statistical Testing.

Hrs: 8

Sampling, Sampling distributions, standard error, test of significance for large samples: test of hypothesis for means and proportions, Test of Significance for means of two Large samples: students't' distribution, Chi-square distribution as a test of goodness of fit. Test of independence of attributes, ANOVA for one -way and two way classified data.

Textbook 1:Chapter:27-[sections 27.1 to 27.7, 27.12 to 27.19]

Self Learning:.z-Distribution.

RBT Levels: L1, L2 and L3

Module-4: Advanced Statistical Methods.

Hrs:8

Bracketing methods-Graphical method, Bisection method, Multiple roots, Muller's method, Statistical Quality methods, Methods for preparing control charts, Problems using X-bar,p,R charts and attribute charts,

Textbook 2:Chapter:2-[Page 20-62]

Self Learning: Quotient Difference-method

RBT Levels: L1, L2 and L3

Module-5: Complex Variables & Transformations

Hrs:8

Complex Variables: Analytic function, Cauchy-Riemann equation in Cartesian and polar form and Application to flow problems, Conformal transformations: Introduction, Discussion of

transformations: $w = e^z$, $w = z^2$ and $w = z + \frac{1}{z^2}$. Bilinear transformations- Problems.

Textbook 1: Chapter: 20-[sections:20.420.5,20.6, 20.9, 20.12 to 20.24]

Self Learning: Complex Line Integral.

RBT Levels: L1, L2 and L3

IV. COURSE OUTCOMES

- Apply discrete and continuous probability distributions in analyzing the probability **CO1** models arising in the engineering field..
- Construct a Joint probability Distribution and demonstrate the validity of testing the hypothesis. Describe and calculate with discrete time/space Markov chains, including the CO₂ calculation of absorption probabilities
- CO₃ Use the concepts of sampling to make decision about the hypothesis.
- Use the concepts of charts to collect data and quality standards to find new ways to **CO4** improve products and services
- Use the concepts of analytical function and complex potentials to solve the problems in aerofoil theory, fluid flow visualization and imaging process. CO₅

XV: Activity Based Learning

Assignments, Quiz, Presentation.

Semester:	4 th Co	urse Type:		PCC			
Course Title: N	IECHAN	ICS OF MATER	RIALS				
Course Code:	23	3MET402	Credits: 03				
Teachin	g Hours/	Week (L:T:P:O)	3:0:0:@	Total Hours:	40		
CIE Marks:	50	SEE Marks:	50	Total Marks:	100		
SEE Type:		Theory	,	Exam Hours:	3 Hrs		

I. Course Objectives:

- To understand the behaviour of materials under various types of loads on different condition.
- To know the different types of loads and stresses in designing mechanical component.
- To analyse and evaluation of mechanical components under bending, shear and torsional loads
- To understand the failure phenomena of the materials by knowing different strain energy and failure theories.

II. Teaching-Learning Process (General Instructions):

- 1. Chalk and talk.
- 2. Activity based learning
- 3. Beyond syllabus presentation
- 4. Self learning videos
- 5. Conduction of quiz in module wise
- 6. Regular in submission of assignments (One assignment will be given in each module and students to submit the same immediately after completion of the respective module)
- 7. Assigning industrial application problems to solve

III. COURSE CONTENT III(a).Theory PART

Module-1:Simple Stress and Strain

8 Hrs

Stresses and Strains: Introduction, Properties of materials, Stress, Strain and Hooke's law, Stress strain diagram for brittle and ductile materials, True stress and strain, Calculation of stresses in straight, Stepped and tapered sections, Composite sections, , Shear stress and strain, Lateral strain and Poisson's ratio, Elastic constants and relations between them, Principle of super position, Stresses due to temperature change

Textbooks:

- 1. Text Book 1, Chapter 1, Pg. No. 1 to 15
- 2. Text Book 3, Chapter 1, section 1.10.1
- **3.** Text Book 3, Chapter 2, section 2.1 to 2.13

Pre-requisites (Self Learning)

Students should be knowing the properties of different materials

- 1. Making a list of properties of different engineering materials
- 2. Making a list of practical applications of different engineering materials

RBT Levels:	L	l, L2
--------------------	---	-------

Module-2: Analysis of Stress and Strain, Thick and Thin cylinders

8 Hrs

Analysis of Stress and Strain: Introduction to three-dimensional state of stress, Stresses on inclined planes, Principal stresses and maximum shear stress, Principal angles, Shear stresses on principal planes, Maximum shear stress, Mohr circle for plane stress conditions.

Thick and Thin cylinders: Stresses in thin cylinders, Lame's equation for thick cylinders subjected to internal and external pressures, Changes in dimensions of cylinder (diameter, length and volume), simple numerical.

Textbooks:

- 1. Text Book 3, Chapter 3, Section 3.1 to 3.6
- 2. Text Book 3, Chapter 17, section 17.1 to 17.5
- 3. Text Book 3, Chapter 18, section 18.1 to 18.3

Pre-requisites (Self Learning)

- 1. Making a list applications of pressure vessels
- 2. Making a list of companies who manufactures pressure vessels

RBT Levels: L1, L2, L3

Module-3: Shear Force and Bending Moment

8 Hrs

Shear Force and Bending Moment: Type of beams, Loads and reactions, Relationship between loads, shear forces and bending moments, Shear force and bending moments of cantilever beams, Pin support and roller supported beams subjected to concentrated loads, uniformly distributed constant / varying loads.

Textbook:

- 1. Text Book 2, Chapter 6, Section 6.1 to 6.3
- 2. Text Book 3, Chapter 7, section 7.1 to 7.9
- **3.** Text Book 3, Chapter 8, section 8.1 to 8.3

Pre-requisites (Self Learning)

- 1. Solving simple industrial problems of SF and BM. Report to be submitted on the same.
- 2. Listing out the various sections of beams which can be used for industrial applications

RBT Levels: L2, L3

Module-4: Shear Stresses, Torsion

8 Hrs

Stress in Beams: Bending and shear stress distribution in rectangular, I and T section beams. **Torsion:** Circular solid and hallow shafts, Torsional moment of resistance, Power transmission of straight and stepped shafts, Twist in shaft sections,

Textbooks:

- 1. Text Book 2, Chapter 9, Section 9.1 to 9.5
- 2. Text Book 3, Chapter 8, section 8.1 to 8.3

Pre-requisites (Self Learning)

- 1. Identification of importance and practical applications of shafts. Student Presentation on the same
- 2. Writing a note on the procedure to manufacture a shaft.

RBT Levels: L1, L2, L3

Module-5: Theory of columns, Strain Energy

8 Hrs

Theory of Columns: Buckling and stability, Critical load, Columns with pinned ends, Columns with other support conditions, Effective length of columns, Secant formula for columns.

Strain Energy: Strain energy due to axial, shear, bending, torsion and impact load. Castigliano's theorem I and II and their applications.

Textbooks:

- 1. Text Book 1, Chapter 2, Pg. No 83 to 102
- **2.** Text Book 1, Chapter 14, Pg. No 757 to 797

Pre-requisites (Self Learning)

1. Identification of importance and practical applications of industrial columns (Applications of columns in various machineries). Student presentation on the same.

	RBT	Levels:	L1.	L2.	. L3
--	-----	---------	-----	-----	------

IV. COURSE OUTCOMES

At the end of the course, student to:

- **CO1** Understand the importance of stress and strain in various mechanical elements.
- CO2 Determination of various dimensions and stresses in mechanical components like thin and thick cylinders, shafts, columns etc.
- CO3 Apply the knowledge to understand the load transferring mechanism in beams and stress distribution
- **CO4** Evaluate the stresses induced in different cross sectional members subjected to shear loads

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

- 1. Visit to Material Testing laboratory to understand the various testing performed on different materials for different applications.
- 2. Conduction of a Quiz on modules
- 3. Student presentation about the various companies manufactures pressure vessels for industrial applications

Semester:	Type:				IPCC		
Course Title: ADVANCED MACHINING SCIENCE							
Course Code: 23MEI403					Credits:	04	
Teaching	Hours	/Week	(L:T:P:O)	3:0:2:0	Total Hours:	40hrs+Lab slots	
CIE Marks	5: 5	0	SEE Marks:	50	Total Marks:	100	
SEE Type	:		Theory		Exam Hours:	3hrs	

I. Course Objectives:

- To enrich the knowledge pertaining to relative motion and mechanics required for various machine tools.
- To introduce students to different machine tools to produce components having different shapes and sizes
- To develop the knowledge on mechanics of machining process and effect of various parameters on machining.
- To know various non-conventional machining and hybrid machining processes.

II. Teaching-Learning Process (General Instructions):

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- 1. Adopt different teaching methods to develop the outcomes through presentations/ video demonstrations/ simulations.
- 2. Chalk and talk method for problem-solving.
- 3. Adopt collaborative learning in the class.
- 4. Adopt Problem Based Learning (PBL), which fosters students' analytical skills and develops thinking skills such as evaluating, generalizing, and analyzing information.
- 6. Conduct laboratory demonstrations and practical experiments to enhance experiential skills.

III. COURSE CONTENT III(a). Theory PART Module-1: Introduction to Metal cutting 8Hrs

Introduction to Metal cutting: Orthogonal and oblique cutting. Classification of cutting tools: single, and multipoint; tool signature for single point cutting tool. Mechanics of orthogonal cutting; chip formation, shear angle and its significance, Merchant circle diagram. Numerical problems. Cutting tool materials and applications.

Basic requirements of tool materials, major classes of tool materials: high-speed steel, cemented carbide, ceramics, CBN and diamond, tool coatings.

Textbook: 1-Chapter:1 Page no: 1-8, Chapter:2 Page no: 9-14, Chapter:3 Page no: 15-38,

Textbook: 2-Chapter:4 Page no: 154-165 Textbook: 3-Chapter:1 Page no: 5-43

Pre-requisites: Basic knowledge of materials and their properties

RBT Levels: L1.L2

Module-2: Introduction to Machine tools

Introduction to basic metal cutting machine tools:

Lathe- Parts of lathe machine, accessories of lathe Machine and various operations carried out on lathe.

Milling Machines: up milling & down milling, classification of milling machines, constructional features (Column and Knee and vertical milling machine), milling cutter nomenclature, various milling operations-(Plain milling, Angular milling, gang milling, straddle milling, end milling, gear milling (types of gears)).

Indexing: Need of indexing Simple, compound and differential indexing calculations.

Shaping Machines Tools: Driving mechanisms of Shaper, Operations done on Shaper

Drilling Machines: Constructional features (Radial & Bench drilling Machines), operations, types of drill & drill bit nomenclature.

Grinding: Grinding operation, classification of grinding processes: cylindrical, surface & centerless grinding

Textbook: 3-Chapter:2 Page no: 80-83, Chapter:3 Page no: 106-136, Chapter:6 Page no: 177-195, Chapter:7 Page no: 199-236

Pre-requisites: Basic knowledge on application of operation carried on machine tools

RBT Levels:L1,L2

Module-3: Thermal aspects, Tool wear, and Finishing Process

Temperature in Metal Cutting: Heat generation in metal cutting; temperature distribution in metal cutting, effect of cutting speed on temperatures, measurement of cutting temperatures Tool life and tool Wear. The work material and its machinability

Cutting fluids: Action of coolants and application of cutting fluids.

Forms of wear in metal cutting: crater wear, flank wear, tool-life criteria

Finishing Process: Importance of surface finishing processes, Grinding, Abrasive Flow Machining, Honing. Sanding, Abrasive blasting, Polishing, Lapping.

Surface Finishing and Protection: Powder Coating, Liquid Coating, Electroplating, Galvanizing, Anodizing

Textbook: 1-Chapter:11 Page no: 170-205, Chapter:12 Page no: 206-263, Chapter:13 Page no: 265-308

Textbook: 2-Chapter: 3 Page no: 121-133, Chapter: 4 Page no: 141-151 Textbook: 3-Chapter: 1 Page no: 44-69, Chapter: 9 Page no: 271-300

Pre-requisites Basic knowledge of cutting fluids, machining & finishing operation

RBT Levels:L1,L2

Module-4: Advanced Machining Process

Advanced Machining Process

Importance and classification of advanced machining process;

Principal, process parameters, and application of: - Abrasive Jet Machining (AJW), Water Jet Machining (WJM), Abrasive Water Jet Machining (AWJM); Ultrasonic Machining (USM); Electrical Discharge Machining (EDM); Wire Electrical Discharge Machining (WEDM); Electro Chemical Machining (ECM). Laser Beam Machining (LBM), Electron Beam Machining (EBM), and Plasma Arc Machining (PAM).

Textbook: 2-Chapter:14 Page no: 505-547 Textbook: 3-Chapter:11 Page no: 324-375,

Pre-requisites: Basic of machining process

RBT Levels:L1,L2

Module-5: Hybrid Machining Process & CNC

Importance of hybrid machining process;

Process principal, process parameters, and application of: - Electrochemical Discharge Machining (ECDM), Ultrasonic Assisted Electric Discharge Machining (UAEDM), Electrochemical Discharge Grinding (EDG), Powder Assisted Electric Discharge Machining (PAEDM).

Computer Numerical Control: Introduction, components of CNC, CNC programming, manual part programming, G Codes, M Codes, programming of simple components in turning and milling systems.

Textbook: 2-Chapter:12 Page no: 415-423 Textbook: 3-Chapter:16 Page no: 453-503

Pre-requisites: Basics of machining process, NC machine

RBT Levels:L1,L2

III(b). PRACTICAL PART

	(,-),						
Sl. No.	Experiments / Programs / Problems (insert rows as many required)						
1	Study of tool geometry of a single point turning tool (SPTT) in the American Standards						
	Association (ASA) system						
	Preparation of one model on lathe involving - Facing, Plain turning, Taper turning, Drilling,						
	Knurling						
	Preparation of One model on lathe involving - Facing, Step turning, Thread cutting, and						
3	Eccentric turning.						
4	One Job, Cutting of V Groove/ dovetail / Rectangular groove using a shaper						
5	Cutting of Gear Teeth using Milling Machine.						
6	Simple operations and One Job on the drilling						
7	Simple operations and One Job on the grinding machine.						
8	Experiment on simple programming of CNC machine operations-Turning						
9	Experiment on simple programming of CNC machine operations-Milling						
10	Cutting force measurement with dynamometers for turning, drilling, operations. (Demo)						

Instructions for conduction of practical part:

- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report

	IV. COURSE OUTCOMES								
CO1	Demonstrate a comprehensive understanding of the basic principles of metal cutting, including cutting mechanics, tool geometry, and chip formation.								
CO2	Assess the impact of various machining parameters on surface integrity and quality, and develop methods to control and improve these characteristics.								
CO3	Analyze the properties and behavior of various materials during the cutting process, including the effects of material hardness, toughness, and microstructure on machinability.								
CO4	Explain the material removal mechanisms associated with different advanced machining processes.								
CO5	Utilize advanced computer-aided manufacturing (CAM) software to design and simulate machining processes.								

	V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)															
PO/P	1	2	2	4	7	6	7	8	g	1	11	12	S1	S2	S3	S4

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Mention suggested Activities like seminar, assignments, quiz, case studies, mini projects, industry visit, self-study activities, group discussions, etc

Semester:	IV Course	Туре:		IPCC					
Course Title: F	Course Title: FLUID MECHANICS								
Course Code:	23ME	I404		Credits:	04				
Teachin	g Hours/Week	(L:T:P:O)	3:0:2:0	Total Hours:	40+Lab slots				
CIE Marks:	Marks: 50 SEE Marks:		50	Total Marks:	100				
SEE Type:		Theory		Exam Hours:	03				

I. Course Objectives:

- To have a working knowledge of the basic properties of fluids and understand the continuum approximation
- To Calculate the forces exerted by a fluid at rest on submerged surfaces and understand the force of buoyancy
- To understand the flow characteristic and dynamics of flow field for various Engineering applications.
- To understand the main properties of laminar and turbulent pipe flow and appreciate their differences and the concept of boundary layer theory.
- Understand the concept of dynamic similarity and how to apply it to experimental modelling.

II. Teaching-Learning Process (General Instructions):

Mention the planned/proposed sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- Power-point Presentation
- Video demonstration or Simulations
- Chalk and Talk are used for Problem Solving
- Laboratory Demonstrations and Practical Experiments

III. COURSE CONTENT III(a).Theory PART

Module-1: Introduction and Fluid Statics

8 Hrs

Introduction: Properties of fluids-mass density, weight density, specific volume, specific gravity, viscosity, surface tension, capillarity, vapour pressure, compressibility and bulk modulus. Concept of continuum, types of fluids etc, pressure at a point in the static mass of fluid, variation of pressure, Pascal's law, Absolute, gauge, atmospheric and vacuum pressures pressure measurement by simple, differential manometers and mechanical gauges.

Fluid Statics: Total pressure and center of pressure for horizontal plane, vertical plane surface a

Textbook: 1 Chapter: 1,2 and 3 sections 1.1 to 3.4

Pre-requisites (Self Learning): Fluid properties

RBT Levels: L1, L2, L3

Module-2:Fluid Kinematics

8 Hrs

Fluid Kinematics: Types of Flow-steady, unsteady, uniform, non-uniform, laminar, turbulent, one, two and three dimensional, compressible, incompressible, rotational, irrotational, stream lines, path lines, streak lines, velocity components, convective and local acceleration, velocity

potential, stream function, continuity equation in Cartesian co-ordinates. Rotation, vorticity and circulation, Laplace equation in velocity potential and Poisson equation in stream function, flow net, Problems. Laminar and Turbulent flow: Flow through circular pipe, between parallel plates, Power absorbed in viscous flow in bearings, Poiseuille equation.

Textbook:1 Chapter 5 :sections 5.1 to 5.8

Pre-requisites (Self Learning): Types of fluid flow

RBT Levels: L1, L2, L3

Module-3: Fluid Dynamics

8 Hrs

Fluid Dynamics: Momentum equation, Impacts of jets- force on fixed and moving vanes, flat and curved. Numericals. Euler's equation, Integration of Euler's equation to obtain Bernoulli's equation, Annexure-III 2 Bernoulli's theorem, Application of Bernoulli's theorem such as venture meter, orifice meter, rectangular and triangular notch, pitot tube, orifices etc., related numericals. Loss of head due to friction in pipes, Major and minor losses, pipes in series and parallel.

Textbook: 1 Chapter 6 and 11: sections 6.1 to 6.9 and 11.1 to 11.11

Pre-requisites (Self Learning): Basics of flow measurement

RBT Levels: L1, L2, L3:

Module-4: Flow over bodies and Dimensional Analysis

8 Hrs

Flow over bodies: Development of boundary layer, Lift and Drag, Flow around circular cylinders, spheres, aerofoils and flat plates, Streamlined and bluff bodies, boundary layer separation and its control.

Dimensional Analysis: Derived quantities, dimensions of physical quantities, dimensional homogeneity, Rayleigh method, Buckingham Pi-theorem, dimensionless numbers, similitude, types of similitude

Textbook1: Chapter 14 and 12: sections 14.1 to 14.8.1 and 12.1 to 12.4.4

Pre-requisites (Self Learning): Basics about units & dimensions

RBT Levels: L1, L2, L3

Module-5: Compressible flows and Introduction to CFD

8 Hrs

Compressible flows: Speed of sound, adiabatic and isentropic steady flow, Isentropic flow with area change stagnation and sonic properties, normal and oblique shocks, flow through nozzles. **Introduction to CFD**: Necessity, limitations, philosophy behind CFD, applications

Textbook:1 Chapter: 15 sections 15.1 to 15.9.4

Pre-requisites (Self Learning): Basic knowledge of fluid dynamics

RBT Levels: L1, L2, L3

KRLT	RBT Levels: L1, L2, L3

I. Course Objectives: Student will be able to

- 1. To acquire the knowledge of CAD software and its features
- 2. To familiarize the students with Indian Standards on Drawing Practice
- 3. To make students to analyse and interpret drawing of machine components to 3D-model the assembly drawing manually and using CAD packages
- 4. Learn and apply best practices to create designs that are robust adaptable and cost effective
- 5. Gain hands on experience in practical exercises and projects to reinforce theoretical concepts

Pre requisites (Self Learning)

- 1. Basic engineering drawing
- 2. CAD package usage in 2d mode
- 3. Visualization of 3D components

Sl. No.	Exercises
1	Hexagonal headed bolt and nut with washer (assembly)
2	Square headed bolt and nut with washer (assembly)
3	Joints: Knuckle joint
4	Joints: Spigot and cotter joint
5	Couplings: Flanged coupling,
6	Couplings: Universal coupling
7	Assembly of Machine Components using 3D environment - Plummer Block
8	Assembly of Machine Components using 3D environment - Screw Jack
9	Assembly of Machine Components using 3D environment – Square Tool Post
10	Assembly of Machine Components using 3D environment - Connecting Rod

Teaching Learning Process

Project based learning: Engage students in hands on projects that simulate real world design scenarios, enabling practical application of concepts and fostering deeper understanding **Interactive workshops:** conduct collaborative workshops where the students work together to solve design challenges, encouraging active participation and knowledge sharing **Multidisciplinary Teams:** Form diverse teams for group projects, allowing students to leverage different skill sets

RBT L	RBT Levels: L1, L2, L3, L4								
	II. COURSE OUTCOMES								
CO1	Apply standards in machine drawing components.								
CO2	Impart and analyze the joints and coupling assembly								
CO3	Interpret drawing of machine components leading to preparations of assembly drawing by CAD packages.								

CO4	Ir	Inculcate bill of materials during the design and development of production drawing

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

suggested Activities: case studies, mini projects, self-study activities, etc.

Semester:	IV	Course Type:	ETC						
Course Title: DATABASE MANAGEMENT SYSTEM									
Course Code	Course Code: 23MEE421 Credits: 03								
Teaching Hours/Week (L:T:P:O)				2:0:2:0	Total Hours:	25 hours +Lab slots			
CIE Marks:	50	SEE Ma	arks:	50	Total Marks:	100			
SEE Type:		T	heory		Exam Hours:	03			

I. Course Objectives:

- To Provide a strong foundation in database concepts, technology, and practice.
- To Practice SQL programming through a variety of database problems.
- To Understand the relational database design principles.
- To Demonstrate the use of concurrency and transactions in database.
- To Design and build database applications for real world problems.
- To become familiar with database storage structures and access techniques

II. Teaching-Learning Process (General Instructions):

Teaching-Learning Process (General Instructions)

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- 1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.
- 2. Use of Video/Animation to explain functioning of various concepts.
- 3. Encourage collaborative (Group Learning) Learning in the class.
- 4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- 5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.
- 6. Introduce Topics in manifold representations.
- 7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.
- 8. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students' understanding

Use any of these methods: Chalk and board, Active Learning, Case Studies

III. COURSE CONTENT	
III(a). Theory PART	
Module-1:	5 Hrs

Introduction to Databases: Introduction, Characteristics of database approach, Advantages of using the DBMS approach, History of database applications.

Overview of Database Languages and Architectures: Data Models, Schemas, and Instances. Three schema architecture and data independence, database languages, and interfaces, The Database System environment. Conceptual Data Modelling using Entities and Relationships: Entity types, Entity sets and structural constraints, Weak entity types, ER diagrams, Specialization and Generalization.

Textbook 1:Ch 1.1 to 1.8, 2.1 to 2.6, 3.1 to 3.10

RBT: L1, L2, L3

Module-2: 5 Hrs

Relational Model: Relational Model Concepts, Relational Model Constraints and relational database schemas, Update operations, transactions, and dealing with constraint violations.

Relational Algebra: Unary and Binary relational operations, additional relational operations (aggregate, grouping, etc.) Examples of Queries in relational algebra.

Mapping Conceptual Design into a Logical Design: Relational Database Design using ER-to-Relational mapping.

Textbook 1: Ch 5.1 to 5.3, Ch 8.1 to 8.5; Ch 9.1 to 9.2 Textbook 2: 3.5

RBT: L1, L2, L3

Module-3: 5 Hrs

Normalization: Database Design Theory – Introduction to Normalization using Functional and Multivalued Dependencies: Informal design guidelines for relation schema, Functional Dependencies, Normal Forms based on Primary Keys, Second and Third Normal Forms, Boyce-Codd Normal Form, Multivalued Dependency and Fourth Normal Form, Join Dependencies and Fifth Normal Form.

SQL: SQL data definition and data types, Schema change statements in SQL, specifying constraints in SQL, retrieval queries in SQL, INSERT, DELETE, and UPDATE statements in SQL, Additional features of SQL

Textbook 1: Ch 14.1 to 14.7, Ch 6.1 to 6.5

RBT: L1, L2, L3

Module-4: 5 Hrs

SQL: Advanced Queries: More complex SQL retrieval queries, Specifying constraints as assertions and action triggers, Views in SQL.

Transaction Processing: Introduction to Transaction Processing, Transaction and System concepts, Desirable properties of Transactions, Characterizing schedules based on recoverability, Characterizing schedules based on Serializability, Transaction support in SQL.

Textbook 1: Ch 7.1 to 7.3, Ch 20.1 to 20.6

RBT: L1, L2, L3

Module-5: 5 Hrs

Concurrency Control in Databases: Two-phase locking techniques for Concurrency control, Concurrency control based on Timestamp ordering, Multiversion Concurrency control techniques, Validation Concurrency control techniques, Granularity of Data items and Multiple

Granularity Locking.

NOSQL Databases and Big Data Storage Systems: Introduction to NOSQL Systems, The CAP Theorem, Document-Based NOSQL Systems and MongoDB, NOSQL Key-Value Stores, Column-Based or Wide Column NOSQL Systems

Textbook 1:Chapter 21.1 to 21.5, Chapter 24.1 to 24.6

RBT :	T 1	T 2	T 2
KDI.	L/L,	, L/4,	LJ

KB1: L1, L2, L3										
III(b). PRACTICAL PART										
Sl.	Programs /Experiments									
No.	<u> </u>									
1	Create a table called Employee & execute the following. Employee(EMPNO,ENAME,JOB, MANAGER_NO, SAL, COMMISSION) 1. Create a user and grant all permissions to theuser.									
	 Insert the any three records in the employee table contains attributes EMPNO,ENAME JOB, MANAGER_NO, SAL, COMMISSION and use rollback. Check the result. Add primary key constraint and not null constraint to the employee table. Insert null values to the employee table and verify the result. 									
2	Create a table called Employee that contain attributes EMPNO,ENAME,JOB, MGR,SAL & execute the following. 1. Add a column commission with domain to the Employeetable. 2. Insert any five records into the table. 3. Update the column details of job 4. Rename the column of Employ table using alter command. Delete the employee whose Empno is 105									
3	Queries using aggregate functions(COUNT,AVG,MIN,MAX,SUM),Group by,Orderby. Employee(E_id, E_name, Age, Salary) 1. Create Employee table containing all Records E_id, E_name, Age, Salary. 2. Count number of employee names from employeetable 3. Find the Maximum age from employee table. 4. Find the Minimum age from employeetable. 5. Find salaries of employee in Ascending Order. Find grouped salaries of employees									
4	Create a row level trigger for the customers table that would fire for INSERT or UPDATE or DELETE operations performed on the CUSTOMERS table. This trigger will display the salary difference between the old & new Salary. CUSTOMERS(ID,NAME,AGE,ADDRESS,SALARY)									
5	Create cursor for Employee table & extract the values from the table. Declare the variables ,Open the cursor & extrct the values from the cursor. Close the cursor. Employee(E_id, E_name, Age, Salary)									
6	Write a PL/SQL block of code using parameterized Cursor, that will merge the data available in the newly created table N_RollCall with the data available in the table O_RollCall. If the data in the first table already exist in the second table then that data should be skipped									

IV. COURSE OUTCOMES																
CO1	D	Describe the basic elements of a relational database management system														
CO2	D	Design entity relationship for the given scenario.														
CO3		Apply various Structured Query Language (SQL) statements for database manipulation and normalization forms for the given application .														
CO4	D	Develop database applications for the given real world problem.														
CO5	U	Understand the concepts related to NoSQL databases														
V. CO-PO-PSO MAPPING (mark H=3; M=2; L=1)																
PO/PS O	1	2	3	4	5	6	7	8	9	10	11	12	S1	S2	S3	S4

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Activity Based Learning (Suggested Activities)/ Practical Based learning

1. Mini Project:

Project Based Learning

Semester:	IV Cou	ırse Type:	ETC									
Course Title: D	Course Title: DRIVE SYSTEMS FOR ROBOTICS											
Course Code: 23MEE422 Credits: 3												
Teaching Hour	s/Week (I	:T:P:O)	3:0:0:0	Total Hours:	40							
CIE Marks:	50	SEE Marks:	50	100								
SEE Type:		Theory	7	Exam Hours:	3							

I. Course Objectives:

This course will enable students:

- 1. To introduce various types of drive systems used in Robot development
- 2. To impart knowledge of Hydraulic &Pneumatic Drive systems
- 3. To educate on various Electrical Actuation Systems used in robot application
- 4. To apply knowledge of the basics of Troubleshooting in robot application

II. Teaching-Learning Process (General Instructions):

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- 1. Adopt different teaching methods to develop the outcomes through presentations/ video demonstrations/ simulations.
- 2. Chalk and talk method for problem-solving.
- 3. Adopt collaborative learning in the class.
- 4. Conduct laboratory demonstrations and practical experiments to enhance experiential skills.

III. COURSE CONTENT

III(a). Theory PART

Module-1:Introduction to drive system

8 Hrs

Introduction of drive system, structure of drive system, Necessity of drive system, different types of drive system,

Robot Actuators: types of actuators, Actuators Quality, Characteristics of acting systems, design consideration of drive system, Advantages and limitations of drive system.

Actuators & Drive Systems Textbook: 4, Chapter: 7, sections: 7.11

Pre-requisites (Self Learning): Elements of Mechanical Engineering

RBT Levels: L1,L2,L3

Module-2: ROBOT KINEMATICS AND CONTROL

8 Hrs

Forward Kinematics, Inverse Kinematics and Differences; Forward Kinematics and Reverse Kinematics of Manipulators with Two, Three Degrees of Freedom (In 2 Dimensional), Four Degrees of Freedom (In 3Dimensional), Deviations and Problems. Control of robot manipulators – Point to point, Continuous Path Control.

Textbook:1, Chapter: 8, sections: 8.1 to 8.4

Pneumatic Valves: Textbook:2, Chapter: 6, sections: 6.1 to 6.12

Pre-requisites (Self Learning): Elements of Mechanical Engineering

RBT Levels: L1, L2,L3

Module-3: Hydraulic Drive system

8 Hrs

Linear hydraulic actuators, Types of hydraulic cylinders, Single acting, Double acting special cylinders like tandem, Rod less, Telescopic, Cushioning mechanism, Construction of double acting cylinder, Rotary actuators –Fluid motors, Gear, Vane and Piston motors, Motor performance, Filtration systems and maintenance of system.

Hydraulic actuators: Textbook:3, Chapter:3, sections:3.1 to 3.5 Hydraulic Motors: Textbook:3, Chapter:4, sections4.1 to 4.6

Hydraulic Circuits & Analysis: Textbook:3, Chapter:6, sections:6.1 to 6.9 Maintenance of Hydraulic system: Textbook:3, Chapter:7, sections:7.1 to 7.11

Pre-requisites (Self Learning): Elements of Mechanical Engineering

RBT Levels: L1, L2,L3

Module-4: Pneumatic Drive system

8 Hrs

Properties of air, Compressor, Filter, Regulator, and Lubricator Unit, Compressed Air distribution system, Pneumatic actuators- Linear and Rotary, Tie rod cylinders, Rodless actuators with magnetic linkage or rotary cylinders, Rodless actuators with mechanical linkage, Pneumatic artificial muscles, Vane Motors, Speciality actuators that combine rotary and linear motion—frequently used for clamping operations, Vacuum generators

Pneumatic Components: Textbook:1, Chapter: 13, sections:13.2 to 13.10

Pneumatic Components: Textbook:1, Chapter: 14, sections: 14.6

Pre-requisites (Self Learning): Elements of Mechanical Engineering

RBT Levels: L1, L2,L3

Module-5: Electrical Actuation System and Troubleshooting of the drive system

8 Hrs

Solid State Switches, Solenoids, D.C. motors, A.C. motors, Stepper motors, Servomotors, stepper motors; ac servomotors, dc servomotors,

Troubleshooting of drive systems Identifying root cause, suggest remedies, steps to be followed in troubleshooting.

Electrical Actuation System: Textbook:1, Chapter:15, sections:15.1 to 15.2 Electrical Actuation System: Textbook:2, Chapter:11, sections:11.1 to 11.7

Troubleshooting of the drive system: Textbook:2, Chapter:12, sections:12.1 to 12.9

Pre-requisites (Self Learning): Elements of Mechanical Engineering

RBT Levels:L2,L3

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Activities like seminar, assignments, quiz, case studies, mini projects, industry visit, self-study activities, group discussions, etc

Course Title: MICROCONTROLLERS AND ITS APPLICATIONS											
Course Code: 23MEE423 Credits: 3											
Teaching Hours/Week (L:T:P:O) 2:0:2:0 Total Hours: 25 hours+	+Lab										
slots	3										
CIE Marks: 50 SEE Marks: 50 Total Marks: 100											
SEE Type: Theory Exam Hours: 03											

I. Course Objectives:

- 1.Understand the difference between Microprocessor and Microcontroller and embedded microcontrollers.
- 2. Analyze the basic architecture of 8051microcontroller.
- 3. Program 8051 microcontroller using Assembly Language and C.
- 4. Understand the operation and use of inbuilt Timers/Counters and Serial port of 8051
- 5. Understand the interrupt structure of 8051 and Interfacing I/O devices using I/O ports of 8051

6.Understand the role of Embedded system and its applications.

II. Teaching-Learning Process (General Instructions):

Teaching-Learning Process These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- 1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.
- 2. Use of Video/Animation to explain functioning of various concepts.
- 3. Encourage collaborative (Group Learning) Learning in the class.
- 4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- 5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.
- 6. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.
- 7. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students understanding.

III. COURSE CONTENT

III(a). Theory PART

Module-1 Microcontroller

5 Hrs

Microcontroller: Microprocessor Vs Microcontroller, Micro controller & Embedded Processors, Processor Architectures-Harvard Vs Princeton & RISC Vs CISC, 8051 Architecture- Registers, Pin diagram, I/O

ports functions, Internal Memory organization. External Memory (ROM & RAM) interfacing.

(Text book 1-1.1,Text book 2-1.0,1.1,3.0,3.1,3.2,3.3 Text book 3-Pg 5-9)

Pre-requisites (Self Learning). Microprocessor and Microcontroller

RBT Levels: L1, L2,

Module-2: Instruction Set

5 Hrs

Instruction Set: 8051 Addressing Modes, Data Transfer Instructions, Arithmetic instructions, Logical Instructions, Jump & Call Instructions Stack & Subroutine Instructions of 8051 (with examples in assembly Language). (Text book 2- Chapter 5,6,7,8, Additional reading Refer Textbook 3, Chapter 3 for complete understanding of instructions with flow diagrams)

Pre-requisites (Self Learning) Data Transfer Instructions,

Arithmetic instructions, Logical Instruction

RBT Levels: L1,L2

Module-3: Timers/Counters & Serial port programming

5 Hrs

Timers/Counters & Serial port programming:

Basics of Timers & Counters, Data types & Time delay in the 8051 using C, Programming 8051 Timers, Mode 1 & Mode 2 Programming, Counter Programming (Assembly Language only). (Text book 2- 3.4, Text book 1-7.1, 9.1,9.2)

Basics of Serial Communication, 8051 Connection to RS232, Programming the 8051 to transfer data serially & to receive data serially

using C. (Text book 2-3.5, Text book 1-10.1,10.2,10.3 except assembly

language programs, 10.5)

Pre-requisites (Self Learning): Programming 8051 Timers

RBT Levels:L1,L2

Module-4: 5 Hrs

Interrupt Programming: Basics of Interrupts, 8051 Interrupts, Programming Timer Interrupts, Programming Serial Communication Interrupts, Interrupt Priority in 8051(Assembly Language only)

(Text book 2- 3.6, Text book 1- 11.1,11.2,11.4, 11.5)

Pre-requisites (Self Learning)

Programming Timer Interrupts, Programming Serial Communication Interrupts

RBT Levels:L1,L2,L3

Module-5: Introduction to Arduino-uno board

5 Hrs

Introduction to Arduino-uno board, Analog and Digital pins, programming structure of Arduino, introduction to sensors and actuators, Sensor interfacing, programming to sensors, Motor interfacing, LCD interfacing.

Reference book 3: Chapter 2

Pre-requisites (Self Learning):

Arduino-uno board and its applications

RBT Levels: L1, L2,

PRACTICAL COMPONENT OF IPCC -10 hours

1	Using Keil software, observe the various Registers, Dump, CPSR, with a simple Assembly
	Language Programs (ALP).
2	Develop and simulate ARM ALP for Data Transfer, Arithmetic and Logical operations
	(Demonstrate with the help of a suitable program).
3	Develop an ALP to multiply two 16-bit binary numbers.
4	Develop an ALP to find the sum of first 10 integer numbers.
5	Develop an ALP to find the largest/smallest number in an array of 32 numbers.
6	Develop an ALP to count the number of ones and zeros in two consecutive memory locations
7	Simulate a program in C for ARM microcontroller using KEIL to sort the numbers in
	ascending/descending order using bubble sort
8	Simulate a program in C for ARM microcontroller to find factorial of a number.

VIII: Activity Based Learning / Practical Based Learning/Experiential learning:

Quiz and seminar

Semester:	4	Course Type:		ETC								
Course Title:	Course Title: INSPECTION AND QUALITY CONTROL											
Course Cod	Course Code: 23MEE424 Credits: 3											
Teach	ing Ho	urs/Week (L:T:	P:O)	3:0:0:0	Total Hours:	40						
CIE Marks	50	O SEE Ma	rks:	50	Total Marks:	100						
SEE Type	:	T	Theory Exam Hours: 3									

I. Course Objectives:

- The student should learn different inspection procedures, objectives in industry and economic aspects.
- To impart definition of quality, components, concepts and different approaches followed like quality circles, cost of quality and economic considerations in quality.
- To impart knowledge on various quality standards followed.
- To impart fundamentals of statistical quality control charts, and process capability.
- To impart different sampling techniques and reliability.

II. Teaching-Learning Process (General Instructions):

- Chalk and talk method
- PowerPoint Presentation

III. COURSE CONTENT

III(a). Theory PART

Module-1: Industrial Inspection and Concept Of Quality In Engineering

08 Hrs

Industrial inspection: Objectives and functions of inspection in industry, types of inspection, production / inspection interaction, organization for industrial inspection, inspection procedures, economic aspect of inspection.

Concept of Quality in Engineering: Meaning and significance of quality; essential components of quality; phases or elements for building quality; evolution of the concepts of quality; spiral of progress of quality; quality cost, hidden quality costs; economic models of quality costs, changing scope of quality activities.

Textbook: 01, Chapter: 19, sections: 19.1 – 19.15

RBT Levels: L1, L2

Module-2: Quality Management Systems, Quality Control Function And

08 Hrs

Aspects of Specification And Tolerances

Quality Control Function: Inspection versus quality control techniques, quality planning activities, organization for quality control. Fundamentals of statistical quality control, Juran's quality trilogy.

Aspects Of Specification And Tolerances: Aspects of Specification and Tolerances: purpose of specification and tolerances, effect of careless setting of specification limits, setting realistic tolerances, statistical tolerancing, statistical theorem, Precision. Reproducibility and Accuracy,

Textbook: 02, Chapter: 09, sections: 9.1 - 9.5

RBT Levels: L1, L2

Module-3: Control Charts

08 Hrs

Control Charts: Basics of Control Chart: Variability, Kinds of variations, Types of errors, Control limits specification limits and Natural Tolerance limits, Charts for variables and attributes, application of control charts for averages, range, standard deviation, Interpretation of X-bar and R Charts- cyclic patterns, mixture, shift, trend and stratification, fraction defectives (p Chart) and number of nonconformities per unit (c Chart), process capability analysis and simple numerical problems.

Textbook: 01, Chapter: 17, sections: 17.1 – 17.17

RBT Levels: L1, L2, L3

Module-4: Acceptance Sampling & Reliability

08 Hrs

Acceptance Sampling: Elementary concepts, sampling by attributes, single, double and multiple sampling plans, construction and use of operating characteristic curves and simple problems. Reliability: Reliability engineering, rectification processes in industries, practical activity – quality report building, reliability function, failure rate, mean time between failures (MTBF), mean time to failure (MTTF), mortality curve, useful life availability, maintainability, system effectiveness and simple numerical problems on reliability, MTBF and MTTF

Textbook: 02, Chapter: 11, sections: 11.1 – 11.5

RBT Levels: L1, L2, L3

Module-5: Quality Tools and Systems & Total Quality

Management

08 Hrs

Quality Management Systems: Introduction to various quality standards – ISO 9000, BIS. Quality Tools: Ishikawa's seven quality tools; Quality Circles; Quality system economics. Total Quality Management (TQM) – definition, objectives, philosophy, and total productive maintenance (TPM) – definition, objectives, principles, implementation of TPM. Difference between TQM and TPM.

Textbook: 02, Chapter: 10 & 16,

RBT Levels: L1, L2

1121			.,												
	IV. COURSE OUTCOMES														
CO1		Gain a knowledge on industrial inspection activity and concept of quality in engineering.													
CO2		Understand various quality systems, quality control function, specification and tolerances prevalent in industry.													
CO3	a	Construct various control charts based on data available in an industrial production, can also dwell upon the status of a process whether in control or out of control and find number of defectives													
CO4	(Carry	out sa	mpling	g, relia	ability	techn	iques	with a	ın indi	ustrial	applic	cation.	•	
CO5	I	Learn	about	apply	ing di	fferent	t quali	ty too	ls and	total	quality	y mana	ageme	nt.	
				V. CO)-PO-	PSO	MAP	PING	(marl	к H=3	; M=2	; L=1))		
PO/PS	1	2 3 4 5 6 7 8 9 10 11 12 S1 S2 S3 S4

III. COURSE CONTENT

III(a). Theory PART

Module-1: (Introduction and Basic Sketching in Creo)

Hrs: 07

Introduction to Creo Parametric (Overview and system requirements, Feature-based nature, bidirectional associative property),

Getting Started with Creo Parametric (User interface and navigation, Important terms and definitions, managing files, menu manager, model tree)

Basic Sketching (Invoking the Sketch Mode, Sketcher environment, Drawing basic shapes: points, lines, centrelines, rectangles, circles, ellipses, arcs, Dimensioning sketches and modifying dimensions, Applying constraints)

Mini Project: Design and model a basic mechanical part (e.g., a bracket) with proper dimensioning and constraints, and create detailed 2D drawings

Pre-requisites (Self Learning)

Familiarity with engineering drawings and drafting principles is beneficial but not mandatory

RBT Levels: L1,L2,L3,L4,L6

Module-2: (Advanced Sketching and Part Modelling)

Hrs: 07

Advanced Sketching Techniques (Dimensioning using baseline and replace tools, Creating fillets (circular and elliptical), splines, and text and other modifiers, Importing 2D drawings)

Creating Base Features(Invoking the part mode, Creating protrusions (extrude,

revolve), Understanding datum planes and parent-child relationships)

Datum and Feature Construction (Creating datum planes, axes, and points Creating cuts using extrude and revolve Adding construction features: holes, rounds, chamfers, ribs)

Mini Project: Design a simple mechanical part (e.g., a Ball bearing) and use baseline and replace dimensioning tools to add precise measurements to key features

Pre-requisites (Self Learning)

Familiarity with engineering drawings and drafting principles is beneficial but not mandatory

RBT Levels: L2,L3,L4,L6

Module-3: (Advanced Modelling and Assembly)

Hrs: 06

Advanced Modelling Tools (Sweep and blend features (parallel, rotational, general), Shell features, datum curves, and draft features, Variable section sweep and helical sweep)

Assembly Modelling (Top-down and bottom-up approaches, Placement constraints and assembling components, Exploded views)

Drawing and Detailing (Generating different drawing views, Dimensioning and adding annotations, Modifying and editing drawing views.)

Mini Project: Develop a comprehensive project involving the design, assembly (Ex: a Flange Coupling Assembly, Or Real world component)

Pre-requisites (Self Learning)

Familiarity with engineering drawings and drafting principles is beneficial but not mandatory.

RBT Levels: L2,L3,L4,L6

Module-4: (Introduction to HyperMesh and Pre-processing)

Hrs: 10

Introduction to HyperMesh:(Overview of HyperMesh and its applications in finite element analysis, Understanding the HyperMesh user interface and layout.), Geometry Import and Clean-up:(Importing CAD models into HyperMesh, Geometry clean-up techniques including healing, repairing, and simplification)

Mesh Generation:(Introduction to meshing and its importance in finite element analysis, meshing techniques including element types, mesh controls, and quality checks.)

Boundary Conditions and Loads:(Applying boundary conditions such as constraints and supports to the model, defining loads including point loads, distributed loads, and surface loads)

Element Properties: Assigning material properties and section properties to the elements.

Solver Setup: Configuring solver settings and defining analysis parameters.

Pre-requisites (Self Learning)

Basic understanding of FEA and structural mechanics concepts is recommended.

RBT Levels: L2,L3,L4,L6

Module-5: (Analysis and Post processing)

Hrs: 10

Static Analysis:(Introduction and applications of static analysis, setting up and solving static analysis problems.)

Results Interpretation: (Understanding and interpreting analysis results, Visualization techniques, contour plots, deformed shapes.)

Optimization:(Introduction to optimization techniques, Topology and shape optimization, setting up studies.)

Mini Project: Static Analysis and Result Interpretation on a simple part or assembly, interpreting results, Generating a comprehensive report.

Pre-requisites (Self Learning)

Basic understanding of FEA and structural mechanics concepts is recommended.

RBT Levels: L2,L3,L4,L6

III(b). PRACTICAL PART

(Fill this portion III(b) if course type is integrated or else delete this portion, if course type is only practical, delete the theory part III(a) and retain this section)

	IV. COURSE OUTCOMES								
CO1	Develop proficiency in navigating the Creo Parametric interface.								
CO2	Learners will proficiently employ advanced sketching techniques and create precise base features								
CO3	Learners will efficiently create and manage assemblies in Creo Parametric, integrating diverse components, establishing placement constraints, and visualizing assemblies through exploded views								
CO4	Students will demonstrate proficiency in importing CAD models into HyperMesh and applying geometry clean-up techniques to ensure accurate and efficient finite element analysis.								
CO5	Students will demonstrate expertise in utilizing HyperMesh to create detailed simulations and conduct accurate analyses

Semester: IV	/ Course T	ype:		NCMC							
Course Title: MINDFUL MASTERY : APTITUDE AND SOFTSKILL INTEGRATION											
Course Code	: 23PDS	N04		Credits:	PP/NP						
Teachin	g Hours/Week	(L:T:P:O)	0:0:0:2	Total Hours:	24						
CIE Marks:	50	SEE Marks:		Total Marks:	50						
SEE Type:		NA		Exam Hours:	00						

Course Objectives:

- > To comprehend numerical relationships, place value, fractions, decimals, percentages, ratios, and proportions.
- Learn how to prioritize tasks and activities based on importance and urgency..
- Understanding of different types of data representations, such as tables, charts, graphs, and diagrams.
- Learn how to interpret different body language signal and their meanings.
- Learn Strategies for breaking down complex problems into manageable steps

II. Teaching-Learning Process (General Instructions):

Chalk and Talk

Principal

Academic Director

iv) IAT QP shall be designed to attain the different levels of Bloom's taxonomy as per the outcomes defined for the course.

B. Formative assessments:

- i) 02 formative assessments each of 50 marks shall be conducted by the course coordinator based on the dept. planning during random times.
- ii) One formative assessment shall be completed before 5th week and second shall be completed before 12th week.
- iii) The syllabus content for the formative assessment shall be defined by the course coordinator.
- iv) The formative assessments include Assignments/seminars/case study/field survey/ report presentation/course project/etc.
- v) The assignment QP or Quiz QP shall indicate marks of each question and the relevant COs & RBT levels.
- vi) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs and get it approved from academic dean.

The final CIE marks will be 50:

 $CIE = Avg. \{Avg. of two tests + Avg. of two FA\}$

The documents of all the assessments shall be maintained meticulously.

2. IBSC/IESC/IPCC- Integrated with Theory & Practical (04 credit courses), ETC (if offered as integrated course)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.

Continuous Internal Evaluation:

The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50).

Minimum eligibility of 40% marks shall be attained separately in both the theory component and practical component.

CIE will be conducted by the department and it will have 02 component:

- I. Theory Component.
- II. Practical Component.

I. Theory Component:

Theory component will consist of

- A. Internal Assessment Test (IAT).
- B. Formative assessments (FA).

The minimum passing mark for SEE is 35% of the maximum marks (18 out of 50 marks).

Semester-End Examination:

Only theory SEE for duration of 03 hours and total marks of 100.

- i) The question paper will have ten questions. Each question is set for 20 marks.
- ii) There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), should have a mix of topics under that module.

The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE and SEE taken together.

Page 2 of 9

A. Internal Assessment Test:

- i) There are 02 tests each of 50 marks conducted during 8th week & 15th week.
- ii) The question paper will have four questions (max of 3 sub questions) from the notified syllabus. Each question is set for 25 marks.
- iii) It is suggested to include questions on laboratory content in the Internal Assessment test Question papers.
- iv) The student must answer 2 full questions (one from 1st & 2nd questions and another from 3rd & 4th question).
- v) IAT QP shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

B. Formative assessments:

- i) 02 formative assessments each of 50 marks shall be conducted by the course coordinator based on the dept. planning during random times.
- ii) One formative assessment shall be completed before 5th week and second shall be completed before 12th week.
- iii) The syllabus content for the formative assessment shall be defined by the course coordinator.
- iv) The formative assessments include Assignments/seminars/case study/field survey/ report presentation/course project/etc.
- v) The assignment OP or Quiz OP shall indicate marks of each question and the relevant COs & RBT levels.
- vi) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs and get it approved from academic dean.

II. Practical Component:

- C. Conduction of each experiment/program should be evaluated for 50 marks and average of all the experiments/programs shall be taken. (rubrics will be published by the concerned committee)
- D. One laboratory Internal Assessment test will be conducted during the 14th week for 50 marks. (rubrics will be published by the concerned committee)
- E. If the course project / mini project is involved in the laboratory component. The evaluation shall be completed by 14th week of the semester. The rubrics required for the evaluation of the project shall be defined by the departments along with mapping of relevant COs & POs and get it approved from academic dean.

- iii) The laboratory content must be included in framing the theory question papers.
- iv) The students have to answer 5 full questions, selecting one full question from each module.
- v) Marks scored shall be proportionally reduced to 50 marks.

No Practical SEE for Integrated Course.

Note: CAED Course shall not be considered here. It shall be considered as in sl. No. 3 in the next

Page 3 of 9

Principal

Note:

- i) If component 'E' is involved in the course, either component 'D' or 'E' along with component 'C' shall be considered for average of item II.
- ii) Otherwise, components 'C' & 'D' shall be considered for average of item II.

The final CIE marks will be 50:

CIE= Avg. {I [Avg. of two tests + Avg. of two FA] + II [Avg. of (C & (D or E))]} The documents of all the assessments shall be maintained meticulously.

Note: CAED Course shall not be considered here, it shall be considered as in sl. no. 3 in the next row.

3. IESC: CAED Course (4 credits)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.

The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50).

- i) CIE shall be conducted for max, marks of 100 and shall be scaled down to 50
- ii) CIE component should comprise of both Manual and computer drafting i.e. 50% manual and 50% computer drafting out of total 100 marks
- iii) CIE component should comprise of Continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.

	Module	Evaluation W mar	0 0
Module	Max. Marks	Computer display and print out	Manual Sketching
Module 1	20	10	10
Module 2	20	10	10
Module 3	20	10	10
Module 4	20	10	10
Module 5	20	10	10
TOTAL	100	50	50

The minimum passing mark for SEE is 35% of the maximum marks (18 out of 50 marks).

Semester-End Examination:

SEE for duration of 03 hours and total marks of 100.

- i) SEE shall be conducted and evaluated for maximum marks of 100 and shall be scaled down to 50 marks.
- ii) Question paper shall be made available for each batch as per schedule.
- iii) Evaluation shall be carried jointly by both the internal & external examiners.
- iv) Scheme of Evaluation: To be defined by both the examiners jointly.
- v) Maximum 3 questions shall be set as per the following pattern.

The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE and SEE taken together.

Page 4 of 9 Principal

- iv) At least one Test covering all the modules is to be conducted for 100 marks during 14th week and the same is to be scaled down to 25 Marks.
- v) Assignments = 10 Marks from each module. (50 marks scaled down to 25 Marks)
- vi) The final CIE 50 marks = Test (25 marks) + Assignment (25 marks).

	From Mod	lule	Marks Allotted
Mod	dule 01 (Choic Lines or Pla	HAROMAN SERVING CARROLLAND	30
М	odule 02 (Cor question		40
Mo	dule 03 or Mo Module 0		30
	TOTAL	,	100
Q. No.	Manual Sketching	Computer display and print out	TOTAL MARKS
1	15	15	30
2	20	20	40
3	15	15	30
TOT.	50	50	100

4. PCCL: Laboratory course (01 credit course)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.

Continuous Internal Evaluation: The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50).

CIE will be conducted by the department and it will have only 01 component:

- I. Theory Component. (Not required for Laboratory course)
- II. Practical Component.

II. Practical Component:

- C. Conduction of each experiment/program should be evaluated for 50 marks and average of all the experiments/program shall be taken (rubrics will be published by the concerned committee).
- **D.** One laboratory Internal Assessment test will be conducted for 50 marks (rubrics will be published by the concerned committee).
- E. If the course project / mini project is involved in the laboratory component. The evaluation shall be completed by 14th week of the semester. The rubrics required for the evaluation of the project shall be defined by the departments along with mapping of relevant COs & POs and get it approved from academic dean.

The minimum passing mark for SEE is 35% of the maximum marks (18 out of 50 marks).

Semester-End Examination:

Only laboratory SEE will be conducted jointly by the internal examiner and external examiner appointed by COE as per the scheduled timetable for duration of 03 hours.

- The examination shall be conducted for 100 marks and shall be reduced to 50 marks proportionately.
- ii) All laboratory experiments/programs are to be included for practical examination.
- iii) Breakup of marks (Rubrics) and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners (OR) based on the course

The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE and SEE taken together.

Page 5 of 9

rincipal

Academic Director 10 2

Note:

- i) If component 'E' is involved in the course either component 'D' or 'E' along with component 'C' shall be considered for average of item II.
- ii) Otherwise, components 'C' & 'D' shall be considered for average of item II.

The final CIE marks will be 50 = Avg. of (C & [D or E])

The documents of all the assessments shall be maintained meticulously.

- requirement evaluation rubrics shall be decided jointly by examiners.
- iv) Students can pick one question (experiment/program) from the questions lot prepared by the internal /external examiners iointly.
- v) Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
- vi) General rubrics suggested for SEE: writeup-20%, Conduction procedure and results-60%, Viva-voce 20% of maximum marks.
- vii)Change of experiment is allowed only once and shall be assessed only for 85% of the maximum marks.

5. AEC: Ability Enhancement Courses (01 credit courses)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.

The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) out of 50).

Continuous Internal Evaluation:

CIE will be conducted by the department and will have only 01 component:

I. Theory component.

Theory Component will consist of

- A. Internal Assessment Test (IAT).
- B. Formative Assessments (FA).

A. Internal Assessment Test:

- i) 01 test of 50 marks conducted during 15th week.
- ii) The question paper will be of Multiple-Choice Questions (MCQ).
- iii) The student must answer all questions.
- iv) IAT QP shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

The minimum passing mark for SEE is 35% of the maximum marks (18 out of 50 marks).

Semester-End Examination:

Theory SEE will be conducted by COE as per the scheduled timetable for duration of 02 hours and total marks of 50.

- i) Multiple choice Question paper.
- ii) The students have to answer all questions.

The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE and SEE taken together.

Page 6 of 9

Principal

B. Formative assessments:

- i) 01 formative assessment of 50 marks shall be conducted by the Course coordinator based on the dept. planning during 12th week.
- ii) The formative assessments include Assignments/seminars/case study/field survey/report presentation/course project/etc.
- iii) The assignment QP shall indicate marks of each question and the relevant COs & RBT levels.
- iv) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs.

The final CIE marks will be 50:

CIE = Avg. of 02 events (01 IAT and 01 FA).

The documents of all the assessments shall be maintained meticulously.

6. HSMC: (01 credit course)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.

Continuous Internal Evaluation:

The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50).

CIE will be conducted by the department and will have only 01 component:

I. Theory component.

Theory Component will consist of

- A. Internal Assessment Test (IAT).
- B. Formative Assessments (FA).

A. Internal Assessment Test:

- i) 01 test of 50 marks conducted during 15th week.
- ii) The question paper will be of Multiple-Choice Questions (MCQ).
- iii) The student must answer all questions.
- iv) IAT QP shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course

B. Formative assessments:

- i) 01 formative assessment of 50 marks shall be conducted by the faculty based on the dept. planning during 12th week.
- ii) The formative assessments include Assignments/seminars/case study/field survey/ report presentation/course project/etc.

The minimum passing mark for SEE is 35% of the maximum marks (18 out of 50 marks).

Semester-End Examination:

Theory SEE will be conducted by COE as per the scheduled timetable for duration of 02 hours and total marks of 50.

- i) Multiple choice Question paper.
- ii) The students have to answer all questions

The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE and SEE taken together.

Academic Director

iii) The assignment QP shall indicate marks of each question and the relevant COs & RBT levels. iv) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs.		
The final CIE marks will be 50: CIE = Avg. of 02 events (01 IAT and 01 FA).		
The documents of all the assessments shall be maintained meticulously.		
7. HSMC: (0 credit courses)		
The weightage is only for Continuous Internal Evaluation (CIE).		
Continuous Internal Evaluation: The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). CIE will be conducted by the department and it will have only 01 component: I. Theory component. Theory Component will consist of A. Internal Assessment Test (IAT). B. Formative assessments (FA).	No Semester End Examination.	The student is declared as a pass in the course if he/she secures a minimum of 40% (20 marks out of 50) in the CIE.
A. Internal Assessment Test: i) 01 test of 50 marks conducted during 15 th week. ii) The QP will be of Multiple-Choice Questions (MCQ). iii) The student must answer all questions. iv) IAT QP shall be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course		
B. Formative assessments: i) 01 formative assessment of 50 marks shall be conducted by the faculty based on the dept. planning during 12 th week. ii) The formative assessments include Assignments/seminars/case study/field survey/ report presentation/course project/etc. iii) The assignment QP shall indicate marks of each question and the relevant COs & RBT levels. iv) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs. The final CIE marks will be 50: CIE = Avg. of 02 events (01 IAT and 01 FA). The decompants of all the assessments shall be maintained meticulously.		
The documents of all the assessments shall be maintained meticulously.	6

8. NCMC: (0 credit course)

The weightage is only for Continuous Internal Evaluation (CIE).

Continuous Internal Evaluation: The minimum passing mark for the CIE is No Semester End Examination. 40% of the maximum marks (20 marks out of 50).

CIE will be conducted by the department and it will have only 01 component:

I. Theory component.

Theory Component will consist of only 01 assessment

- A. Internal Assessment Test (not required for NCMC course).
- B. Formative Assessment (FA).

B. Formative assessments:

- i) 01 formative assessment of 50 marks shall be conducted by the faculty based on the dept. planning during random times during 12th week.
- ii) The formative assessments include Quiz/Assignments/seminars/case study/field survey/ report presentation/course project/etc.
- iii) The assignment QP shall indicate marks of each question and the relevant COs & RBT levels.
- iv) The rubrics required for the other type of formal assessments shall be defined by the departments along with mapping of relevant COs & POs.

The final CIE marks will be 50.

The documents of all the assessments shall be maintained meticulously.

The student is declared as a pass in the course if he/she secures a minimum of 40% (20 marks out of 50) in the CIE.

PROGRAM OUTCOMES

PO/ PSO Number.	A. PROGRAM OUTCOMES
PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change
	B. PROGRAM SPECIFIC OUTCOMES
PSO1	Apply the Knowledge & Skill of Mechanical Engineering on Design, Manufacturing and Thermal platforms to address the real life problem of the society.
PSO2	Design and implement new ideas with the help of CAD/CAM and Industrial Automation tools.
